EUROPEAN BRAND WITH GLOBAL SIGNIFICANCE

With 75 years of tradition and over 10,000 employees Gorenje is one of the largest home appliances manufacturers in the Southeast Europe. Since 2018 Gorenje has been part of the Hisense corporation, a global technology leader. Along with Hisense and the premium brand Asko, Gorenje is one of the Corporation's three global brands.

Gorenje, **high-quality** and **intelligently designed** home appliances are smart and efficient, with **high performance** and **low energy consumption**. They deliver the **best results** every time as well as they enable **simplicity in experience**. Gorenje is successfully fulfilling the **vision of a more connected life**, simplified by a series of connected devices designed with advanced digital solutions and services.

Gorenje's **unique specialty** are **thoughtfully designed product lines**, made in cooperation with **famous designers** such as **Ora-ïto**, as well as **lifestyle collections** to suit different tastes from retro, classic to modern. Gorenje's reputation is recognized by numerous prestigious international awards including the latest Red Dot Design Award, received recently for the new **Gorenje Simplicity** induction hob.

WELCOME TO YOUR LIFE SIMPLIFIED

We believe in a simpler life. In spending time with our loved ones. Revelling in small moments and big milestones.

Everything we do, we do with one goal. To simplify your life. We take inspiration from life and always innovate with you, our simplicity enthusiasts, in mind. We know, what you expect is simplification, not complexity. That is why every innovation, new technology or service we provide has to have a simplifying purpose.

When you choose a Gorenje appliance, you choose truly effortless, reliable and efficient technology built around your needs. You choose to live healthy, to always expect superior results, enjoy flexibility and guidance. You choose to simplify your chores, from the smallest everyday moments to life's biggest events.

We would like to inspire you to embrace simplicity. To make your home life simpler. Simplifying everything around daily tasks you need to do, so that you have more time for everything you love to do.

A CENTERPIECE OF EVERY KITCHEN

MODERN FREESTANDING COOKERS

Imagine cooking becoming a stress-free fun activity. With the new cookers, completely adapted to you and your preferences, it is. By enabling you to cook and bake at once, you not only save time and space, but can also get creative using innovative technologies, that inspire you with smart functions and features, helping you in preparing healthy, tasty meals for your family and friends. Just like a master chef!

Make it crispy or tender, always perfect.

FOR HEALTHY INDULGENCES

AirFry

Now you can have the crispiness and tastiness of fried food without the extra calories. This method of extremely intensive baking with hot air doesn't require any fat to ensure that perfectly delicious crunchy golden crust. Suitable for small cuts of meat, fish, vegetables and pre-prepared frozen products, like French fries and chicken nuggets.

MIMICS TRADITIONAL OVENS

HomeMade shape

Evenly baked every time

Gorenje cooker ovens are well known for their innovative rounded cavity, which has been their distinctive feature for many years. The HomeMade shape was inspired by the traditional wood burning ovens and ensures better circulation of air compared to competitors.

Now, the HomeMade shape has been completely revamped and the airflow perfected due to a new heater design and the improved distribution of the ventilation openings. That is why the temperature is stable throughout the cooker oven. Never again will your dishes be burnt on one side and underdone on the other.

BEST PIZZA IN TOWN

Pizza function

This program with setting of baking temperature up to 300 °C was specifically designed to help you bake the perfect pizza, focaccia, flatbread and similar baked delicacies.

SuperSize

**EVENLY
BAKED**

Ready for XXL recipes

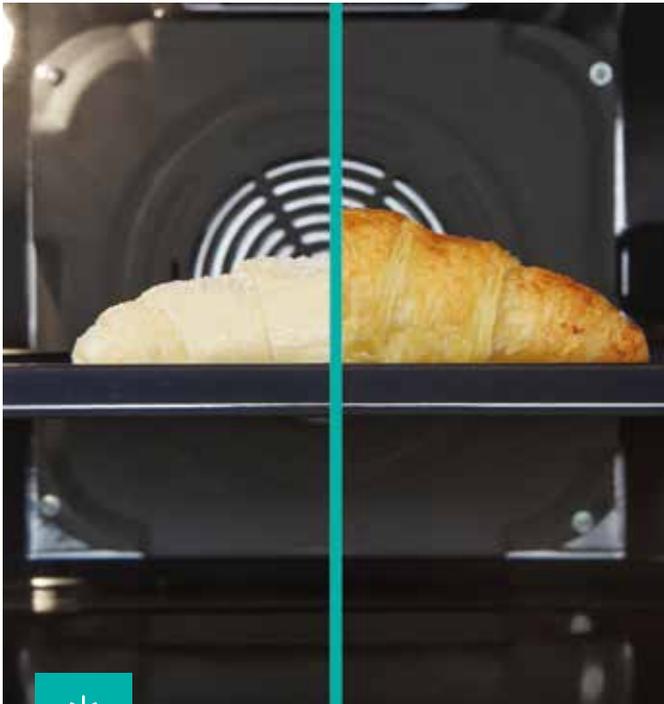

Gorenje cookers offer enlarged baking surface and use of extra big trays. Innovative solutions enable optimised energy consumption and evenly cooked food, regardless of the quantity. Full oven width is efficiently used while superior technology makes sure the food is evenly done on all levels.

GentleClose

A soft touch is enough

Only a soft touch is needed to close the oven door smoothly, without any noise.

FrozenBake

The fastest way to bake frozen goodies

This efficient baking program is the perfect choice for all frozen food and pre-prepared meals.

OpenView

Excellent overview of the baking process

Advanced and even double lighting featured in some models of cookers enable clear view of the large oven cavity. Combined with special design of the glass door, this brings excellent overview of the baking process.

MultiAir Technology

Perfect from all sides

MultiAir technology guarantees the optimal circulation of heat within the oven. Due to smartly positioned ventilation openings on the back wall and the unique rounded shape, air is spread evenly throughout the oven. The fan pushes hot air around the entire oven volume, making the food perfectly baked on all sides. The dynamic air movement also allows simultaneous baking on multiple levels without smells and flavours mixing together.

ExtraSteam

The simpler way to bake with steam

This program creates the perfectly steamed environment that ensures your bread will have a high rise and crunchy crust. All you have to do is put some water into a shallow tray, select the ExtraSteam program and let the oven do the work.

ClosedDoor grill

Optimal cooking results

Enjoy perfectly juicy meals with our innovative grill feature. Designed for gas ovens with a flame below, it allows you to grill behind closed doors, preserving the food's juiciness without excessive browning. Unlike other ovens that require an opening at the top, this design ensures optimal cooking results every time.

PerfectGrill

A double heater for evenly crispy food

The best baking results are achieved with a combination of larger and smaller heaters, where the latter is positioned inside the larger one. The smart positioning of the heaters allows optimal heat distribution and provides the ultimate baking results every time, so food is crispy on the outside and soft on the inside.

FastPreheat

For last minute inspiration

OptiBake cooker ovens reach a temperature of up to 200 °C in just 4.50 minutes, saving 30 % of the time needed by standard preheating and making them one of the fastest ovens on the market.

This is very convenient for recipes that require a preheated cooker oven. A light and sound signal informs you when the temperature is just right.

MultiLevel Baking

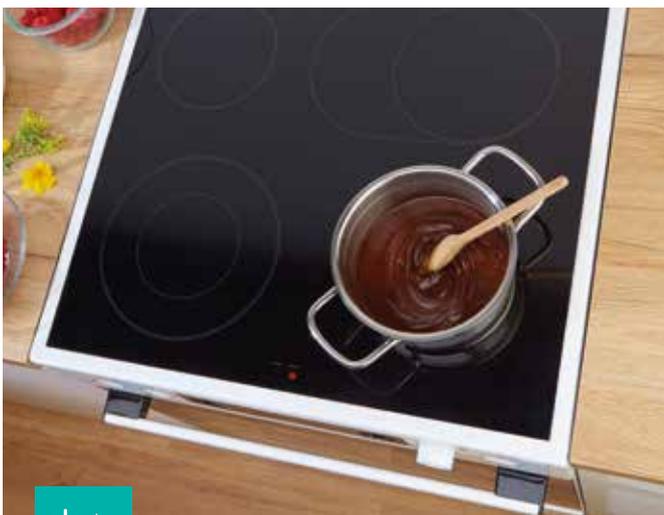

When you want to make it all

Combination of smart air movement, evenly distributed spaces between the tray positions and special slightly rounded cavity ensure the food is evenly baked on every level and since the oven volume is larger, the overview is excellent as well.

VARIETY OF HEATERS FOR BEST COOKING RESULTS

Hi-Light cooktop

Gorenje hi-light cooktops are designed as an easy-to-use tool that enables everyone to cook with great results. Efficient and smart, hi-light hobs are equipped with features that make cooking effortless. They offer double or oval cooking zones for best fit to your needs. With special features like residual heat indicators, timer and smart control they provide perfect control of the process and bring maximum safety.

SoftMelt

One, two, chocolate

The SoftMelt function gently melts chocolate or butter at a constant temperature of 42°C, thereby creating perfect conditions for melting, without burning. This function can also be used for gentle defrosting.

Dual ring cooking zone

Expanding the cooking zone

In addition to three conventional hi-light heaters, the hi-light glass ceramic hob also features a heater with a double circular surface that can adapt to pots and pans of varying sizes.

PERFECT TASTE WITH SPARK OF CREATIVITY

Gas Cooktop

Cooking like a chef can be simple. All it takes is a creative spark as Gorenje cooker with gas cooktop will take care of everything else. BigSurface, powerful ChefBurners and other advanced features offer support for your wildest cooking endeavours. Ignite your inspiration and surprise your loved ones with perfect home-made dishes.

One hand ignition

Simple and convenient

One-hand burner ignition brings extra comfort and easy control to your cooker with gas cooktop. To activate the gas burner simply press the knob down and rotate it to desired level with one hand while your other hand is free. Quick, simple, and efficient.

Cast iron ProGrids

Strong, stable and durable support

Massive and elegant cast iron ProGrids are extremely stable and resistant even to the highest temperatures. They bring superior stability, durability and user-friendly design to your kitchen.

WokBurner

Powerful cooking, great authentic taste

New wok burner with special shape of gas crown directs flame directly to wok and enables even more powerful cooking with up to 4.0 kW power. Asian cuisine, vegetables and other dishes have never been so crisp and delicious, yet done so quickly.

Italian gas burners

Sabaf burners for even heat distribution and consistent flames

Experience top-tier Italian craftsmanship with Sabaf burners. Known for even heat distribution and consistent flames, these high-quality burners ensure perfect cooking every time. Durable, efficient, and reliable, they bring Italian excellence to your kitchen.

FROM “CLEAN” TO ULTRA CLEAN

UltraClean DISHWASHERS

When it comes to the question of cleaning dishes, it is not about who or what is going to do it, but rather how it is going to be done. What looks clean is not necessarily clean, as eyes cannot detect the bacteria or virus. Gorenje new generation of UltraClean dishwashers ensure your family totally clean and perfectly dry dishes every time. Inside the elegant design they bring you high quality and high-hygiene performance with amazing new features that really simplify your everyday life. Spacious and flexible interiors, adjustable baskets or high-pressure water jets that effectively remove dirt, further contribute to the quality of the new Gorenje dishwashers.

Perfectly cleaned dishes ready to serve your next meal.

MORE SPACE THAN IN THE MAGIC HAT

16 place settings

The fully flexible interior allows for different loading options, while three baskets offer enough space to clean even 16 place settings at a time. Now you can really throw the ultimate party!

AUTO
programmes

AutoProgramme

Party for two or twelve – the dishes will be spotlessly clean

A dishwashing program saving up to 50% energy with simply detecting how dirty your dishes are. Special sensors for water turbidity detect the dirtiness of the dishes and adjust the duration of the main washing cycle and the temperature of the water for the washing cycle, which can be between 45C and 65C. The auto program is therefore always the most optimal and energy-efficient way to wash dishes.

TotalDry

Perfect dry dishes

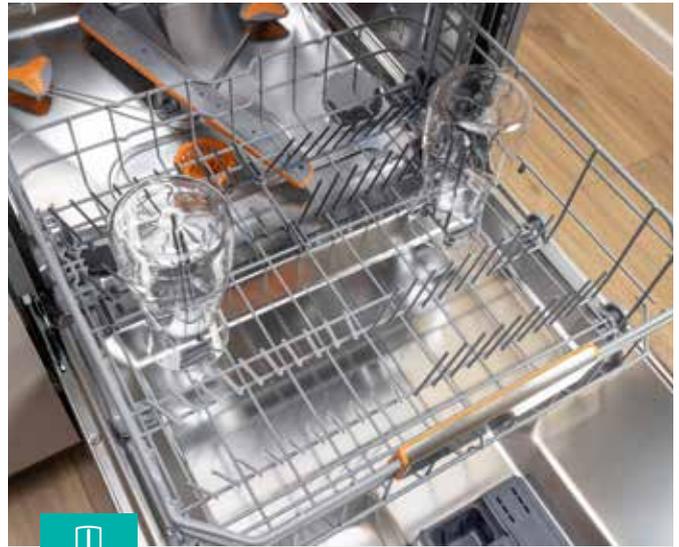

Excellent for quick drying with low energy consumption. After the washing cycle, the dishwasher door automatically opens just slightly to let out the excess steam. This allows fresh air to reach the tableware, so the washed items like plastic dishes dry completely.

Fast 1h

Effectively fast

An effective and fast programme designed for daily use on dishes with slightly dried leftovers. This program works at 65°C and it is finished in 1 hour.

BottleWash

Effortless bottle cleaning

Designed to securely hold a variety of bottle sizes for a safe and thorough clean every time. The water jet under the stick reaches deep into hard-to-clean areas, tackling stubborn spots and ensuring every bottle comes out sparkling and hygienic. Enjoy a smarter, more effective way to keep your bottles pristine – without any extra effort!

15 min SpeedWash

Clean fast so you can slow down

Imagine throwing a dinner party and the dishes from the main course are cleaned in the time it takes to serve dessert. When you select the one hour programme together with the SpeedWash function, Gorenje dishwashers will do your dishes in only 15 minutes. Perfect for handling the volume of dishes created by having multiple guests in the house.

Intensive Clean Zone

Perfect solution for toughest stains and highest level of dirtiness

The additional spray arm, located at the top of the dishwasher, ensures better water coverage and through rinsing for up to 30 % better cleaning results. All dishes and cutlery will always be washed to perfection.

Interior lighting

Perfect surveillance

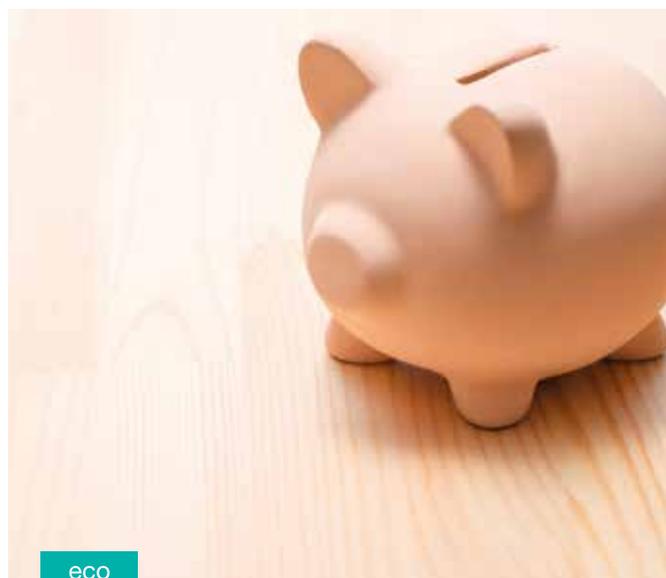

The careful placement of the LED light elegantly illuminates the dishwasher's interior, which enables easy loading and unloading.

StartDelay

Clean dishes, lower electricity bill

Program to start the dishwashing process later and let the dishwasher work whenever it is most convenient, for example when electricity is cheaper. The dishes will be perfectly washed right when you need them.

EcoProgramme

Saving energy

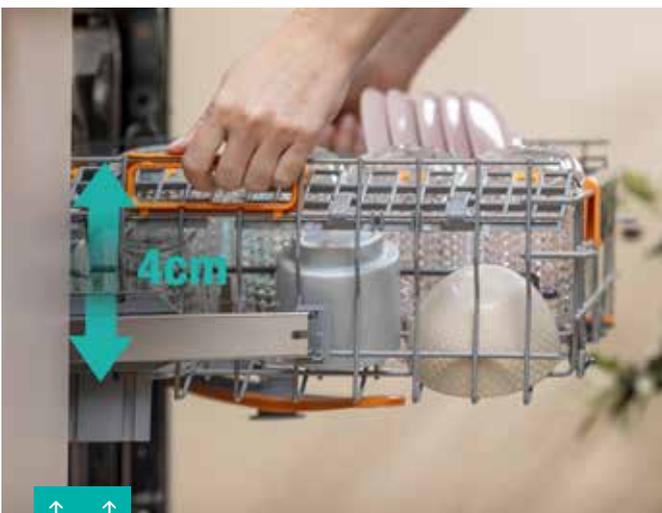

When you select the ECO programme, your appliance will use lower wash and rinse temperatures and minimise the amount of water required while still achieving effective dirt removal.

Adjustable baskets

Carefully designed interior

The baskets are equipped with highlighted movable elements and a customizable basket layout for easy loading. The truly simple two level basket adjustment system allows you to fit even the biggest pots and plates. The plate rack in the lower basket can be easily folded. Cutlery can be perfectly organized on a special tray, where they are positioned separately for perfect cleaning and drying results. Every detail is carefully designed for easiest possible handling.

MultiClick

Adjusted to every single pot

The truly simple two level basket adjustment system allows you to fit even the biggest pots and plates. It makes your dishwasher's interior completely adjustable to your current needs.

SmartControl

Clarity and control

Navigating your dishwasher has never been easier. All the controls are located at an ergonomic position with a straightforward left-to-right logic of operation. While all models excel with the white LED display, some of the more advanced models are also enriched with touch control. Just one touch is enough to start the dishwashing process.

DetergentDispenser

Minimalistic sliding detergent dispenser

The new Gorenje dishwashing appliances are fitted with a minimalistic sliding detergent dispenser from where the pod pops out silently. The functionality of easy-to-clean dispenser makes better detergent dosage and wash all types of dishes.

Total AquaStop

Do not worry about water spillage

With the AquaStop safety feature, the dishwasher can be safely left to operate at night as well as in your absence. In case of a leakage or flooding, AquaStop automatically cuts off the water supply while the pump drains the water out of the dishwasher tub. AquaStop remains fully functional over the lifetime of the appliance.

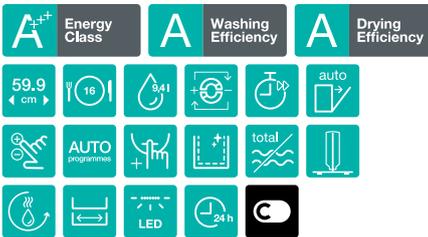

SuperSilent

No louder than a whisper

The best Gorenje UltraClean dishwashers operate at noise level which is equivalent to a whispered conversation between two people. The silent operation comes as a result of special sound insulation, efficient motors, high-quality materials and innovative solutions of the dishwashing system.

FRESH – NO MATTER WHAT

FRIDGE FREEZERS

Gorenje fridge freezers are designed for maximum freshness. Their **IonAir** with **MultiFlow 360°** technology continuously refreshes the air to simulate the natural microclimate and provide perfect storage conditions. With smart, user-friendly functions they seamlessly adapt to your lifestyle. No matter how often you open the fridge door, **AdaptTech** maintains the optimal temperature and keeps your food in perfect shape, while the **NoFrost Plus** cooling system prevents the accumulation of frost and eliminates defrosting.

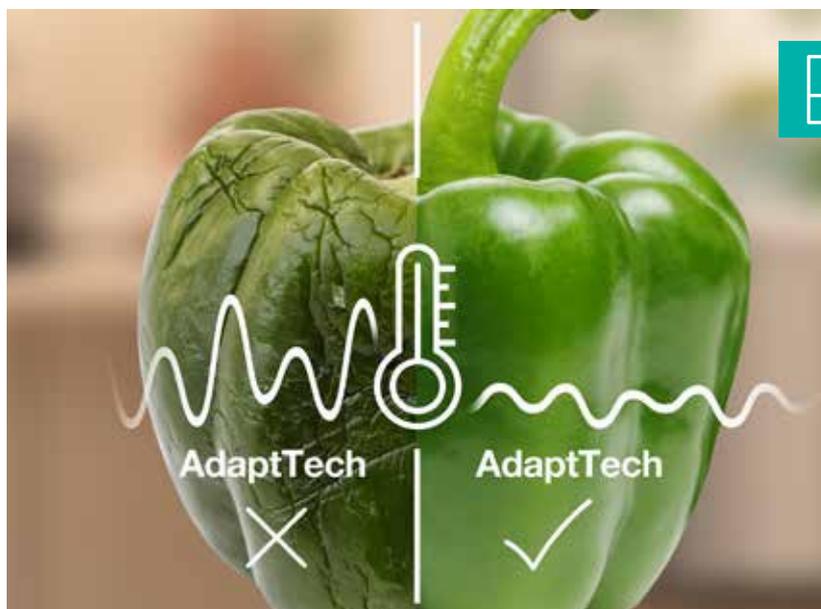

Keeps your food healthy and tasty.

IDEAL MICROCLIMATE ON EVERY SHELF

IonAir with MultiFlow 360°

IonAir with MultiFlow 360° technology continuously refreshes the air, evenly distributes the air in the refrigerator compartment to ensure optimum circulation of air and best storage conditions for your food.

AdaptTech

A fridge that recognizes your habits

This smart system was developed to maintain a constant temperature in the refrigerator regardless of how often you open the door. The refrigerator continuously monitors the way you use it and manages the temperature to prevent any increase in temperature, ensuring your food stays fresh and lowering energy consumption.

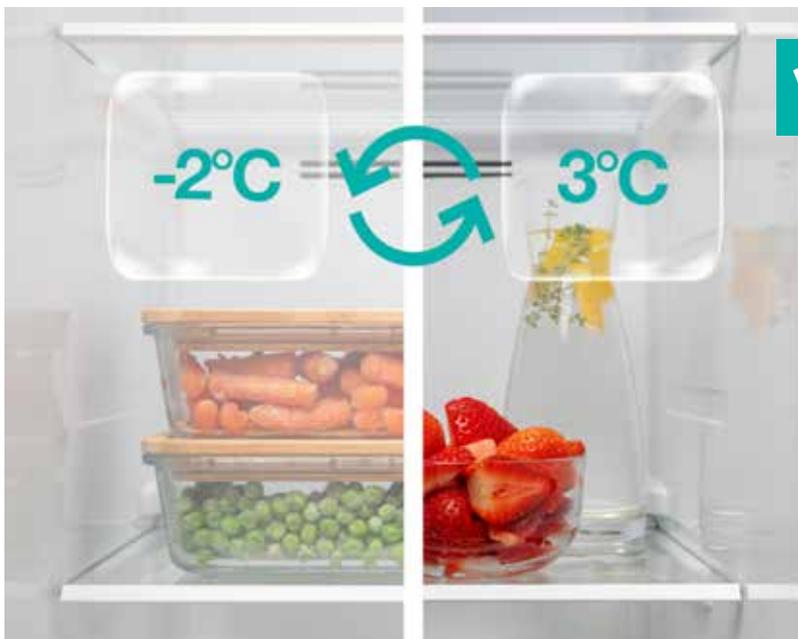

STEADY, SILENT, AND DURABLE

InverterCompressor

Inverter compressors are quieter, more durable and consume less energy as compared to a conventional compressor. They adapt better and faster to temperature changes inside the refrigerator, for example when the door is opened, which means less temperature fluctuations and better storage conditions for your food.

ConvertActive

The big party can start

With ConvertActive it only takes a simple press of a button to turn the freezer compartment into a refrigerator compartment or large ZeroZone, affording more space for storage of snacks or beverages.

NoFrost

No more tedious defrosting

One of the best cooling systems in the market, installed in the freezer compartment, prevents the accumulation of ice and frost to keep the power consumption low. As a result, the usage of the storage capacity is optimal, and defrosting and cleaning of the interior are no longer necessary. Packages or pieces of frozen food will not stick to each other, keeping your food in the freezer neat and tidy.

XtraSpace

Practical and spacious

Efficiently designed interior offers enough space for larger quantities of food, saving you the frequent shopping trips. The food can be easily organized on glass shelves, in large drawers, or the bins on the inner wall of the door, meaning you can always see what's available and waste less.

SensoTech

Advanced control via LED display

Large and clearly laid out LED display allows instant control over the temperature settings. Features like FastFreeze and HolidayMode can be switched on with a simple touch. And in case of a sudden increase in temperature an integrated alarm will warn you right away.

IceMaker with WaterDispenser

Enjoy water and ice, with or without direct water supply

The touch-controlled IceMaker with WaterDispenser lets you enjoy chilled water, crushed ice, and ice cubes, and is available in both plumbed and non-plumbed versions. Thanks to its slim design, it doesn't take up much space inside the refrigerator.

Bottle rack

The right place for bottles and cans

A special rack is provided for the bottles in the refrigerator. It is mounted under the glass shelf to optimize the use of storage space. It can hold up to 9 wine bottles or 14 half-litre cans in two levels.

FreshZone

Fresh as if straight from nature

The drawer with the lowest temperature in the refrigerator is ideal for storing meat, fish, fruit, and vegetables. It will preserve the food's freshness, aroma, colour, and flavour for much longer.

LedLight

Well-arranged and efficient

LED lighting in refrigerators provides excellent and highly efficient illumination as it has a much longer useful life and uses significantly less power than conventional light bulbs.

SuperCool

Rapid cooling after weekly shopping

The intensive cooling function drops the refrigerator temperature to 3 °C, which is lower than usual by nearly a half. Combined with large refrigerator compartment volume, this temperature is ideal for rapid cooling of food after major shopping trips. After six hours, the function is switched off automatically and the refrigerator compartment temperature returns to the initial setting.

FastFreeze

Rapid freezing

The FastFreeze function freezes the food at -24 °C to preserve most of the minerals in the food. After approximately 2 days, the function is switched off automatically and the freezer compartment temperature returns to the initial setting. And in case you forget, smart sensors make sure the function is switched on at the right time.

GENTLE EFFICIENCY FOR CLEAN FRESHNESS

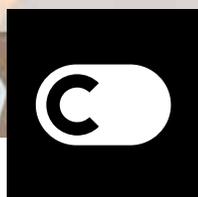

WaveActive WASHING MACHINES

Make your washing routine simple as well as time and energy efficient with always freshly cleaned laundry. The secret to superior laundry experience lies in powerful hygienic performance and various programmes tailored to different fabrics and needs. Innovative **AirDry function** prevents your washing machine from unpleasant odours, while **SteamTech** ensures garments to be thoroughly clean, less creased and softer. With **AutoDosing System** you will no longer waste any detergent and if you are constantly in a hurry the **FastWashing programme** will fit you perfectly. Opting for connected appliances will streamline your daily routine, offering enhanced functionality through the **ConnectLife** application. Experience the convenience of expert tips and tricks, ensuring perfect laundry care.

Save time, save energy, enjoy simplified life.

ALL ABOUT YOUR WASHING MACHINE AT YOUR FINGERTIPS

ConnectLife

Simplify your life and have all the possibilities to control and check your washing machine via app on your mobile device. Remote control, mobile notifications and ticketing are functionalities that will help you manage all washing machine operations smoother and faster from wherever you are.

WashingAssist

With washing assist, you don't have to worry about the hard work. Just choose the type and colour of laundry, how dirty it is, and whether there are any tough stains to treat. Washing assist will suggest the most suited washing program, which you can start directly from the app.

Additional washing programmes

Would you like to wash a special laundry or, for example, children's toys? With ConnectLife app, the desired programme is easily accessible. The application has up to 20 additional washing programmes available for different types of laundry, which are at hand when you need them most.

Notification

No matter where you are and what you are doing, you will be always immediately notified on your mobile device about all the activities of your washing machine. Get notified at the end of the washing cycle, even when the detergent out as well as in case of errors and alarms.

RemoteControl

Have you forgot to activate the washing programme? You can simply start your washing machine via the application from anywhere. Turn on the washing machine, choose selected programme, activate desired functions, and enjoy life simplified.

AirDry

Clean machine for perfectly clean laundry

AirDry function keeps the odours away from your washing machine, by fully drying the detergent dispenser, drum and door seal to keep your appliances extra clean and hygienic with no additional effort from your side.

WaveActive drum & DrumClean

Sensitive treatment of any garment

The unique wave-shaped drum pattern in combination with special wave-shaped 3D ribs softens the fibres to provide the most gentle garment treatment for perfectly clean laundry with a minimum wrinkles.

Always pleasantly smelling laundry

Washing with washing powder at lower temperatures may lead to ideal conditions for development of bacteria which in turn could cause a foul smell of your laundry. The DrumClean program will eliminate any bacteria in the machine interior and ensure your laundry will always smell fresh.

WashControl

Save resources with up to 68% less energy consumption, 45% water savings and 21% savings on time.

Every load, large or small, comes out clean and fresh. The Motor Weight Control system adjusts washing parameters based on laundry weight, ensuring optimal water and energy usage, resulting in shorter cycles and less costs. Enjoy eco-friendly, effective and cost saving washing.

*Based on internal testing, applicable models with Motor Weight Control save up to 68% of energy costs, up to 45% of water consumption and up to 21% time savings. Comparison of energy costs made on the ECO 40-60 program between full and quarter load.

EnergyClass A -40%

Top energy efficiency and significant cost savings

Enjoy excellent cost savings and environmental benefits with remarkable 40%* reduction in energy consumption, outperforming the industry standard for A class – making this a smarter, more sustainable choice for eco-friendly solutions.

*Based on internal testing, applicable models with improved washing parameters are up to 40% more efficient than required to achieve the A energy efficiency class limit under Regulation (EU) No 2019/2014.

Inverter PowerDrive motor

Powerful, yet silent motor

This quiet, but very efficient motor is designed to ensure a long life of your washing machine, saving energy with each cycle.

AutoDosing System

Stay without dosing for up to one month

This unique AutoDosing system saves you time, detergent, and energy! Simply pour the detergent into the container and stay without dosing for up to one month, which is on average 20 washing cycles. Based on the program you select, the washing machine will automatically release the right amount of detergent. The container is removable, dishwasherable, and easy to clean.

Aqua JetWash

Excellent at dissolving stains in a shorter period of time

Experience pristine laundry effortlessly with Aqua JetWash. This system fights dirt efficiently, using high-pressure water spraying in the drum for faster detergent mixing and up to 40%* better stubborn stain removal. Function is active during the washing stage.

Anti-Crease function

Minimise crease in your clothes

If you can't take the laundry out of the washing machine right away don't worry, this feature will make sure your laundry doesn't get extra crumpled. Gorenje Washing machines feature called Anti-Crease function is designed to reduce creasing. Your drum will rotate for 2 hours to minimize creasing on the clothes after washing your clothes. You can stop this function anytime with pressing Start/stop button or on/off.

FabricCare

Double the lifespan of your clothes

Designed for lightly soiled laundry, providing a softer and effective wash without damaging fibers and prevent wear and tear. Utilizing a special algorithm, it reduces laundry wear by up to 70%*, highly extending your clothes' lifespan. Protect your wardrobe and the environment with this unparalleled washing option.

SteamTech

Deep-cleaned and smooth garments, without softeners

Forget softener! Additional steam treatment at the end of the selected programme significantly reduces wrinkles, odours and bacteria. Your garments will be thoroughly clean, less creased and softer.

StainExpert

The most efficient stain care

Effective removal of stains no longer requires a high temperature or additional treatment of clothing before the wash. The perfect combination of temperature, time, and water will automatically remove up to 36 types of stubborn stains from 3 main groups: fruit (oranges, tomato sauce); organic stains (fat, butter, eggs, grass) and coffee (including tea, chocolate yoghurt, pasta, make-up)

Triple A

Efficient spinning, low energy consumption and silent operation

Gorenje is proud to offer a range of washing machines with Triple A ratings for energy efficiency (A rating), low noise, and excellent spinning performance. The lower noise levels of these machines make them an ideal choice for those who wish to use them at night or in other low-noise situations without disturbing others around them. Our commitment to delivering the best-in-class performance and efficiency is reflected in our cutting-edge technology, including the innovative Inverter PowerDrive motor, which reduces vibration, noise, and energy consumption. In addition, our advanced spinning system ensures that your clothes come out evenly spun and with fewer wrinkles.

PowerWash 59'/32'

Washed in less than 1 hour

You will need less than an hour to wash your clothes, thanks to this quick and intensive washing programme suitable for a half load.

ExtraHygiene program

Removes up to 99,9 % of bacteria from your clothes

ExtraHygiene steam washing program, tested and certificated by Intertek, removes up to 99,9 % of bacteria and yeasts from your laundry with the help of steam and high-temperature washing. Clothes will be perfectly clean and at the same time your washing machine will be clean for a longer time, without microbial coatings and related unpleasant odors.

GOODBYE WRINKLES, HELLO SOFTNESS

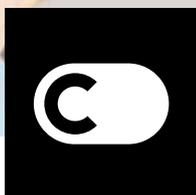

WaveActive TUMBLE DRYERS

Are you worried about drying sensitive garments in tumble dryer? Don't, thanks to **NatureDry** function that keeps your delicate laundry soft without any fear of shrinkage. Like drying on the fresh air. Say goodbye also to worries about wrinkles and ironing as **SteamTech** makes your clothes smoother and softer as well as free from bad odours and allergens. To save you precious time and energy the new tumble dryers surprise you with **Fast 89'** programme, bringing you amazing drying results in just 89 minutes. Do you want to know when the laundry is dry to avoid unnecessary wrinkling? No matter where you are, the mobile application **ConnectLife** sends you notification.

Experience the freshness of air-dried laundry.

ALL ABOUT YOUR TUMBLE DRYER AT YOUR FINGERTIPS

ConnectLife

Simplify your life and have all the possibilities to control and check your tumble dryer via app on your mobile device. Remote control, mobile notifications and ticketing are functionalities that will help you manage all tumble dryer operations smoother and faster from wherever you are.

DryingAssist

With drying assist, you don't have to worry about selecting the best program. Just choose the type of laundry and how dry you want it to be. Laundry Assist will suggest the most suited drying program, which you can start directly from the app.

Additional drying programmes

Different types of clothes require different care and drying methods. With ConnectLife app, up to 10 additional drying programmes are available to you at any time, which can be easily selected with a few right clicks on your smart device.

DrySync – always the right drying treatment

You never have to think about suitable drying program when using device linkage between the washing machine and the tumble dryer, as the setting gets transferred to the dryer after the wash cycle finished.

Notification

No matter where you are and what you are doing, you will be always immediately notified on your mobile device about all the activities of your tumble dryer. Get notified at the end of the drying cycle so your clothes don't cool down and wrinkle, as well as in case of errors and alarms.

NatureDry

Gently dried garments without shrinking

The best way to dry your laundry is by hanging it out in the fresh air of nature, and we have created a program that mimics this process. By using a lower temperature, our program can effectively dry all kinds of laundry, including delicate laundry and sportswear.

WaveActive drum

Sensitive treatment of any garment

The unique wave-shaped drum pattern softens the fibres for the most gentle treatment of all kinds of fabrics. You'll have perfectly dry laundry with minimum

Drum illumination

No more missed socks

The carefully placed LED light elegantly illuminates the drum and enables easy loading and unloading.

DryControl

Unparallel efficiency and savings with sensor technology

Experience up to 50% less electricity consumption and reduced drying time by up to 46%, ensuring significant cost savings. Smart sensors intricately manage the drying cycle based on your chosen program, fabric type and desired dryness level, guaranteeing perfectly dry clothes without the risk of overdrying. Embrace eco-conscious, proficient and reliable drying.

*Based on internal testing, applicable models save up to 50% of energy and up to 46% of time with sensor drying. Comparison of energy savings was made between full load and half load with 60% and 50% of initial moisture content.

Eco-Conscious

R290 refrigerant is a better choice for the environment

Gorenje is dedicated to protecting the environment, combating climate change, and preserving nature. To achieve this goal, we use heat pump technology with R290 refrigerant, which is eco-friendly. Compared to the conventional refrigerants utilized in other tumble dryers, R290 refrigerant is a better choice for the environment.

ColdSteam

Patented technology offering unmatched results

With recycled condensed water, your Gorenje dryer operates without additional water costs, ensuring both efficiency and eco-friendliness. By atomizing water into the drum with warm air, it seamlessly forms steam, ensuring both efficiency and eco-friendliness while delivering impeccably smooth results.

*Based on internal testing, applicable models with patented ColdSteam technology generate no additional water cost by using recycled condensed water from the drying cycle. Comparisons are made between models with and without ColdSteam.

SteamTech

For smoother, wrinkle-free clothes

Additional steam treatment at the end of the selected programme will make sure your clothes are much smoother and free of allergens and bad odours. The drum is filled with steam that penetrates every fibre for softer laundry that hardly requires any ironing.

SuperHygiene function

Eliminate harmful bacteria from your laundry

Some of the tumble drying machines models are featuring unique SuperHygiene function which works on ExtraHygiene program, removes bacteria and yeasts from your laundry with help of high-temperature drying and special technology inside. Clothes will be perfectly clean and at the same time your drying machine will be longer clean, without microbial coatings and related unpleasant odors.

Bedding

Perfectly dried without twisting

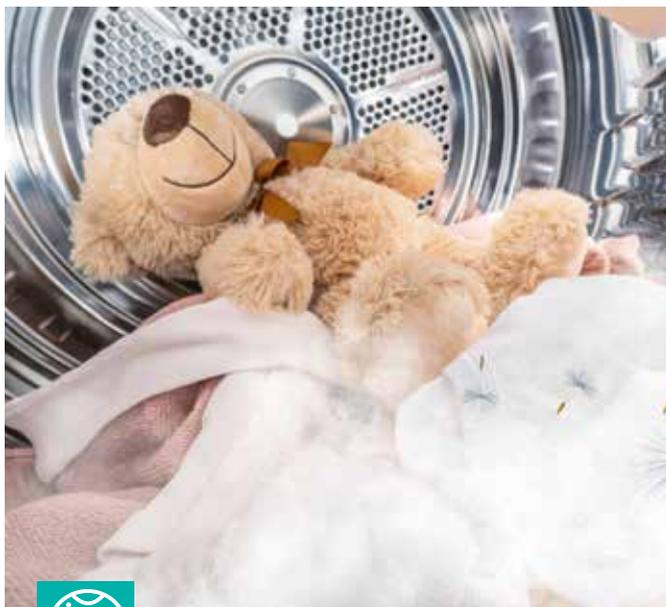

Drying big sheets and other large bedding items in the dryer can result in a big twisted knot in your dryer. The bedding programme with carefully thought out algorithms and drum rotation in both directions prevents twisting and ensures excellent drying results.

Condensation Class A

Eliminates problems of excess humidity when drying clothes

In each drying cycle WaveActive dryers condense an impressive in your home. That means 55 l of water less per year will be 90 % of humidity from clothes, ensuring complete dryness of released into your living space, compared to tumble dryers with your laundry and eliminating any problems of excess humidity A condensation efficiency class.

AllergySteam

Say goodbye to allergies

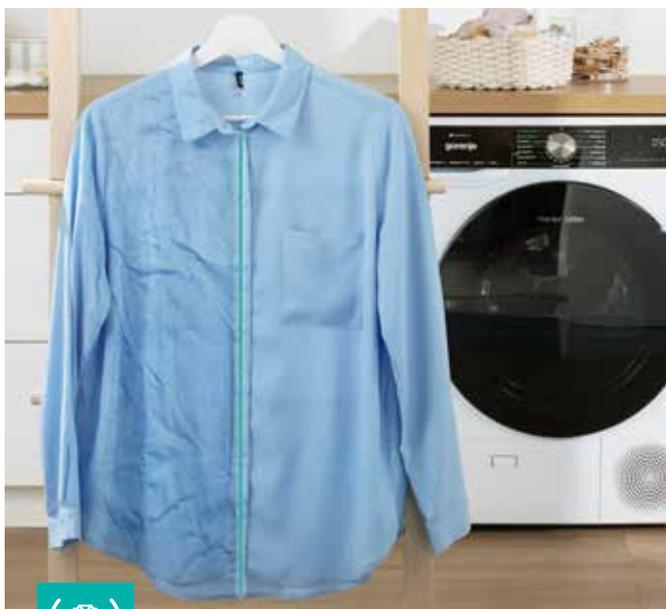

Protect your family against allergies with the intense heat of steam. It efficiently removes allergens, like dust mites and pet dander, without any damage to your clothes.

SensorDrying

Sensor technology for efficient operation

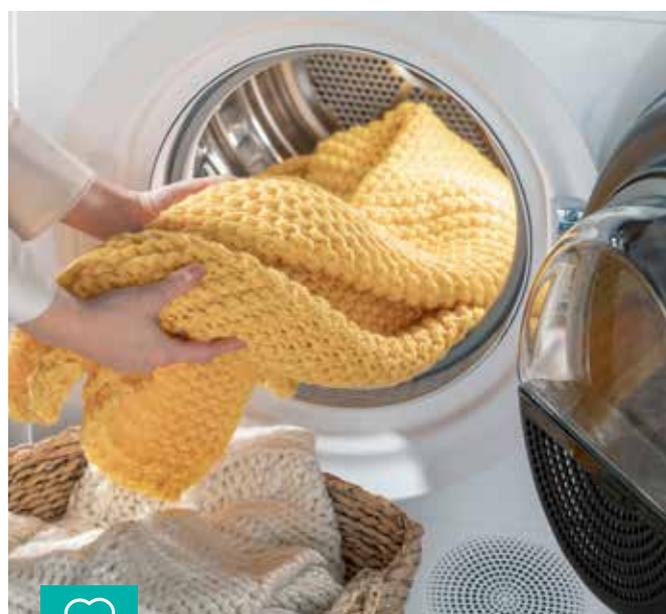

Smart sensor technology automatically controls the drying process according to the selected programme, laundry type and desired level of dryness. The sensors will stop the drying when clothes reach the this level, so you don't overdry them.

AntiCrease function

Less creasing, less ironing

The tumble action in combination with 3D ribs prevents garments from tangling or bundling up, which results in better drying efficiency. A 10-minute period at the end of the cycle slowly cools down the laundry to further reduce creasing. Even when the dryer can't be emptied immediately, your clothes won't get creased by virtue of periodic tumbling of the load for a minimum of 1 hour after the cycle has finished.

GentleDry

Gentle drying of delicate fabrics

Specialized care of the most delicate fabrics operates at a low temperature of 40 °C. A longer drying cycle is entirely safe and reliable as it protects your clothes from any deforming or damage.

HeatPump

Economical and gentle

Heat pump dryers boast high energy efficiency that enable great savings, and also dry more gently than conventional drying systems. The temperature in a heat pump dryer reaches around 50 °C, which allows drying almost all garments, while preventing overdrying and shrinking.

PowerPlusMotor

Powerful, yet silent motor

PowerPlusMotor is the latest generation motor with low-energy operation. It is suitable for heavy loads with low energy consumption, minimal heat emission, and reduced noise levels. This motor is utilized in dryers with high energy efficiency and larger capacities.

Energy class A+++

Best energy efficiency

Thanks to the new HeatPump condenser, smartly developed back wall of the drum and environmentally friendly gas R290, Gorenje provides you with the best energy efficiency A+++ tumble dryers on the market.

AutoDrain

Never empty the condensate tank again

A condensation dryer with the AutoDrain hose can be connected to your plumbing system, saving you the trouble of manually emptying the condensate tank.

AdaptTech drying

No need to repeat your own settings

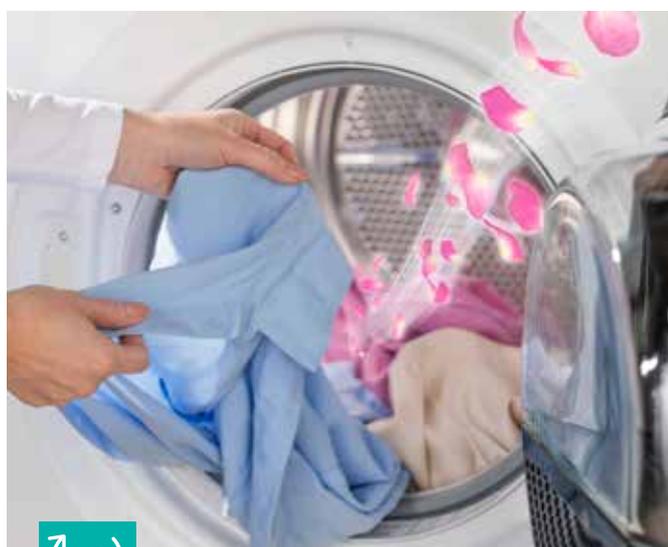

The dryer will memorize (depends on model) if you used the ExtraDry function, lower drying temperature, refreshment function, or anti-crease function for a particular program. The most recent settings will be suggested when you use the same program again.

Fast89'

Good drying result in just 89'. Faster than ever.

Are you in a constant rush with no time for anything? Gorenje Dryer Fast 89' feature is designed precisely with this in mind. This program significantly reduces drying time to brisk 89 minutes. This Gorenje dryer enables a perfect drying experience stress-free while saving your time.

AirRefresh

Quick refreshment for your clothes

Special refresh program for refreshment of your clothes after sport activities or after dinner. Fresh air helps to remove odours, food and cigarette smells. In 30 minutes time your clothes are ready to wear and almost as fresh as just being washed.

TwinAir

Efficient drying of even the largest piles of laundry

Even the largest pieces of laundry will be soft, evenly dried and less creased, straight from the dryer thanks to this patented bi-directional air blowing system.

CHOOSE THE ONE TO SUIT YOUR NEEDS BEST

**DNS12**HEAT PUMP DRYER
G800

- Colour: White

Efficiency

- WaveActive drum
- StableTech sidings
- Drying capacity: **1-10 kg**
- TwinAir
- Drum illumination
- Door diameter: 35 cm
- Door opening angle: 180 °
- Reversible drum action
- Direct discharge of condensate AutoDrain

Control

- Wi-Fi operation: Integrated // ConnectLife
- Simple interface
- Personal settings for all programmes
- LED display // DelayEnd

Programmes

- 15 programmes
- Programmes: Bedding, Wool, Shirts, Sportswear, Timed drying, Cotton standard, Cotton storage, Synthetic/mix iron, Sensitive, Mix dry, Mix iron dry, Baby, Speed 89', ExtraHygiene, Remote control
- Wi-Fi drying programs: Towels, Air refresh, Pillows, Kid toys, Jackets, Sneakers, Underwear
- Drying time selection: Step setting

Functions

- Half load // Dryness level setting
- Antcrease // Refresh function // Time delay

Features

- Dryer modes // Audio signal SoftSound
- Easy filter cleaning // Signal for "full water container"
- Remaining time on display
- NatureDry
- Humidity sensor

Safety

- Lockable control panel
- Long lasting stainless steel drum

Technical data

- Noise level drying: **64 dB(A)re 1 pW**
- Estimated yearly energy consumption: **278 kWh**
- Product dimensions (HxWxD): **85 x 60 x 62,5 cm**

- Product code: **742743**
- EAN code: **3838782721700**

**DPNE92/GNLWIFI**HEAT PUMP DRYER
G400

- Colour: White

Efficiency

- WaveActive drum
- StableTech sidings
- Drying capacity: Large drum volume - **9 kg**
- TwinAir
- Drum illumination
- Door diameter: 35 cm
- Door opening angle: 180 °
- Reversible drum action
- Direct discharge of condensate AutoDrain

Control

- Wi-Fi operation: Integrated // ConnectLife
- Simple interface
- Personal settings for all programmes
- LED display // DelayEnd

Programmes

- 16 programmes
- Programmes: Bedding, Wool, Shirts, Sportswear, Timed drying, AirRefresh, Cotton storage, Cotton iron, Synthetic/mix iron, Sensitive, Mix dry, Mix iron dry, Speed 89', Towels, ExtraHygiene, Pillow, Remote control, Cotton eco
- Wi-Fi drying programs: Towels, Kid toys, Jackets, Sneakers, Underwear
- Drying time selection: Step setting
