EUROPEAN BRAND WITH GLOBAL SIGNIFICANCE

With 70 years of tradition and over 10,000 employees Gorenje is one of the largest home appliances manufacturers in the Southeast Europe. Since 2018 Gorenje has been part of the Hisense corporation, a global technology leader. Along with Hisense and the premium brand Asko, Gorenje is one of the Corporation's three global brands.

Gorenje, **high-quality** and **intelligently designed** home appliances are smart and efficient, with **high performance** and **low energy consumption**. They deliver the **best results** every time as well as they enable **simplicity in experience**. Gorenje is successfully fulfilling the **vision of a more connected life**, simplified by a series of connected devices designed with advanced digital solutions and services.

Gorenje's **unique specialty** are **thoughtfully designed product lines**, made in cooperation with **famous designers** such as **Ora-ïto**, as well as **lifestyle collections** to suit different tastes from retro, classic to modern. Gorenje's reputation is recognized by numerous prestigious international awards including the latest Red Dot Design Award, received recently for the new **Gorenje Simplicity** induction hob.

WELCOME TO YOUR LIFE SIMPLIFIED

We believe in a simpler life. In spending time with our loved ones. Revelling in small moments and big milestones.

Everything we do, we do with one goal. To simplify your life. We take inspiration from life and always innovate with you, our simplicity enthusiasts, in mind. We know, what you expect is simplification, not complexity. That is why every innovation, new technology or service we provide has to have a simplifying purpose.

When you choose a Gorenje appliance, you choose truly effortless, reliable and efficient technology built around your needs. You choose to live healthy, to always expect superior results, enjoy flexibility and guidance. You choose to simplify your chores, from the smallest everyday moments to life's biggest events.

We would like to inspire you to embrace simplicity. To make your home life simpler. Simplifying everything around daily tasks you need to do, so that you have more time for everything you love to do.

'THE MASTERCHEF AT HOME' MOMENTS

Our multi air, self cleaning oven cooks food evenly, perfectly and deliciously. The large cooking surface accommodates pots and pans for those bigger cooking ambitions.

WE MAKE IT
SIMPLIFIED.
YOU MAKE
IT PERFECT.

FREESTANDING COOKERS

Ready to introduce some delicious moments to your kitchen? With the new Gorenje **HomeMade** cookers, this becomes charmingly simple. Prepare your favourite food just like in a traditional wood-burning oven or impress your family with a range of tasty experiences. We designed our cookers with smart and user-friendly solutions, so you can rely on them.

Just add your final touch.

SUCCULENT, YET CRISPY DISHES EVERY TIME

HomeMade Plus shape

MIMICS
TRADITIONAL
OVENS

Seems like there is one universal image we all have in our heads the moment we put a dish to bake in the oven — we all imagine this juicy, yet crispy delicacy coming out once the baking is done. Finally, what was once a dream, is now a constant result you get thanks to our special oval-shaped interior, inspired by wood-burning ovens. This enables the hot air to move around freely embracing your dish and creating that desirable crunchy, yet juicy effect.

SuperSize

EVENLY
BAKED

Ready for XXL recipes

Gorenje cookers offer enlarged baking surface and use of extra big trays. Innovative solutions enable optimised energy consumption and evenly cooked food, regardless of the quantity. Full oven width is efficiently used while superior technology makes sure the food is evenly done on all levels.

BigSpace

More space for greater cooking freedom

The increased capacity of the oven (up to 70 litres) allows preparing bigger quantities of food at the same time. The optimised airflow circulates inside the oven completely freely and with their **BigSpace** cavity Gorenje cookers can easily accommodate even a huge turkey.

DYNAMIC AIR MOVEMENT

PERFECT FROM ALL SIDES

MultiAir Technology

MultiAir technology guarantees the optimal circulation of heat within the oven. Due to smartly positioned ventilation openings on the back wall and the unique rounded shape, air is spread evenly throughout the oven. The fan pushes hot air around the entire oven volume, making the food perfectly baked on all sides. The dynamic air movement also allows simultaneous baking on multiple levels without smells and flavours mixing together.

MultiLevel Baking

Many dishes in one go

Combination of **MultiAir** technology and HomeMade shape helps reach the toughest objective: preparing up to 4 trays of dishes at once. The good news: the flavors and smells don't mix. Smart air distribution ensures that the food is evenly baked on every level.

OpenView

Excellent overview

Advanced and even double lighting featured in some models of cookers enable clear view of the large oven cavity. Combined with special design of the glass door, this brings excellent overview of the baking process.

**CRISPY
OUTSIDE,
SOFT INSIDE**

PerfectGrill

A double heater for evenly crispy food

The best baking results are achieved with a combination of larger and smaller heaters, where the latter is positioned inside the larger one. The smart positioning of the heaters allows optimal heat distribution and provides the ultimate baking results every time, so food is crispy on the outside and soft on the inside. A variable heater combination can use either the inner or outer heater, or both at once. In advanced models, the heater is movable for easier cleaning and maintenance.

Closed door grilling

Keep all the heat right where you need it

Innovative special construction of the chimney in new Gorenje cookers brings you all the benefits of closed door grilling. Faster, safer and more efficient way to perfectly grilled food, while the knobs and cooker surroundings stay nicely cool.

300°C baking

Powerful heat in your kitchen

Special 300°C setting brings the power of professional cooking to your kitchen. This setting is specifically designed to perfectly bake food, such as pizza.

CoolDoor

Made to be touched – anytime, all the time

Special innovative construction and special glazing on the door isolates the oven, so the heat is kept inside, optimising energy consumption by stopping heat escaping from the oven cavity. This makes the cooker even safer for the user, children and pets and prevents warming up the ambient.

ChildLock

The kitchen as a safe environment

ChildLock option is excellent for those who have children at home. Leaving them in a kitchen unauthorized has never been safer, since this option prevents them from resetting any parameters or changing settings on display.

EASY TO CLEAN

Smooth oven door

Simply removable oven door is free of any notches or edges that could harbour dirt, making cleaning quick and easy. Innovative design allows quick and practical removal and cleaning also the space between the glass layers.

SPECIAL PROGRAMMES

Stay Warm

Staying perfect for the latecomers

The **StayWarm** function keeps food at a constant temperature of 70°C until the time is right to serve the meal. The food retains its original flavour and temperature until it is served.

auto

Defrost

In order to keep the food in perfect condition even after defrosting, it is very important to thaw it quickly and that the heat penetrates the core evenly and simultaneously. Safe defrosting is made possible by the defrost program. Use of a drip tray will also prevent undesired drops or spills of liquid. Place the frozen food on the oven rack in the middle of the oven.

The drip tray placed into the lower guide will catch the dripping liquid.

Plate Warming

Serve professional dishes in the comfort of your home

Warmed plates prevent the loss of flavour and ensure that food tastes every bit as good as it should: from soups to pastas and steamed vegetables.

WarmPlate will keep your crockery at precisely the right temperature at 60°C. Enjoy professional service in the privacy of your home.

SilverMatte

Ultra resistant, ultra smooth coatingt

Enamel quality and type are exceptionally important for the cooker and its operation. SilverMatte is a highly resistant and strong material that can stand extreme heats. Free from micro pores, it coats oven cavity surfaces and baking trays, making them resistant to the highest temperatures. The coating of the interior supports heat reflection and provides additional insulation. Therefore, the oven interior always stays sterile and safe.

CataClean

A surface that allows no grease

Catalytic cleaning represents a great assistance in oven maintenance. When the oven reaches 85°C or more during the baking process, catalytic panels automatically start absorbing the grease and impurities.

AquaClean

Simple, casual cleaning

Due to special high-quality enamel , AquaClean function brings even more efficient and user-friendly way of cleaning the oven cavity. All it takes is to pour half a litre of water into a baking tray and turn AquaClean on after each baking. In just 30 minutes, the results are visible on the entire surface and the baking trays. Stains and grease are softened and can be wiped away easily with a soft cloth.

GentleClose

A soft touch is enough

Only a soft touch is needed to close the oven door smoothly, without any noise.

XXL

Extra deep baking tray

Deep enough for all appetites

Higher sides of this extra deep baking tray prevent the fat from splattering and burning onto the oven cavity walls. It is perfect for making meals such as lasagne and roasted meat.

XXL Storage drawer

Everything neatly within reach

A specially large and deep drawer for storing larger cookware or cooking utensils. Trays, baking pans, tableware - have everything you need at hand with this convenient and spacious storage solution.

TouchFree coating

Shiny and fingerprint-free finish

All stainless steel surfaces are coated with a special TouchFree film that prevents fingerprints markings, leaving the surface always shiny and making cleaning much easier.

PERFECT TASTE WITH SPARK OF CREATIVITY

Gas Cooktop

Cooking like a chef can be simple. All it takes is a creative spark as Gorenje cooker with gas cooktop will take care of everything else. With its big surface, powerful burners and advanced features, it offers support for your wildest cooking endeavours. Ignite your inspiration and surprise your loved ones with perfect home-made dishes.

WokBurner

Powerful cooking, great authentic taste

New wok burner with special shape of gas crown directs flame directly to wok and enables even more powerful cooking with up to 4.0 kW power. Asian cuisine, vegetables and other dishes have never been so crisp and delicious, yet done so quickly.

ChefBurners

More powerful and efficient cooking

New high-efficiency **ChefBurners** provide more efficient gas consumption and enable faster and eco-friendlier cooking. Different sizes of burners give you full flexibility, while their user-friendly positioning enables easy and safe cooking.

One hand ignition

Simple and convenient

One-hand burner ignition brings extra comfort and easy control to your gas hob. To activate the gas burner simply press the knob down and rotate it to desired level with one hand while your other hand is free. Quick, simple, and efficient.

Cast iron ProGrids

Strong, stable and durable support

Massive and elegant cast iron ProGrids are extremely stable and resistant even to the highest temperatures. They bring superior stability, durability and user-friendly design to your kitchen.

VARIETY OF HEATERS FOR BEST COOKING RESULTS

Hi-Light cooktop

Gorenje hi-light cooktops are designed as an easy-to-use tool that enables everyone to cook with great results. Efficient and smart, hi-light hobs are equipped with features that make cooking effortless. They offer double or oval cooking zones for best fit to your needs. With special features like residual heat indicators, timer and smart control they provide perfect control of the process and bring maximum safety.

'5 EXTRA PEOPLE FOR DINNER' MOMENTS

No problem. With pre-set programs, flexible space for pots and pans plus purified air makes cooking for friends and family simply a pleasure.

BAKE THE BEST MEMORIES

BUILT-IN OVENS

Years of ambitious research into the physics behind baking, roasting and steaming have led to a wide range of features and functions that offer a unique cooking experience and above all, healthy and tasty results. These spacious ovens are helpful personal assistants with a talent for details, an innovative **HomeMadePlus** shape that distributes hot air evenly, a monitoring device that cooks meat to perfection, a steaming tool that brings in just enough moisture. There are many interesting configurations to choose from, all of which are exceptionally user-friendly and thoughtfully designed to fit well into your kitchen.

Be inspired, have fun, bake you best memories.

SET AND FORGET, YOUR OVEN DOES IT (ALMOST) ALL!

80
PRE-SET
RECIPES

AUTO
programmes

AutoProgrammes with StepBake function

For beginners in the kitchen an oven could seem a bit overwhelming. Don't worry, we've all been there! We made the first steps simple by pre-setting 80 delicious recipes to choose from with all parameters set - baking time, temperature, heat - so you just need to enter the dish weight and press start. Experienced chefs will appreciate the **StepBake** function, letting you pre-set every step of the baking recipe and let the oven do the switching automatically.

HomeMadePlus shape

Juicy on the inside, crunchy on the outside

Thanks to our spacious **HomeMadePlus** solution, your oven-baked dishes will always get a 'wow'! The oval-shaped interior, inspired by traditional wood-fired ovens, ensures an optimum hot air circulation, embracing your dish and making it tender and juicy on the inside and crunchy on the outside. Recessed side walls further reduce any chances for cool spots, bringing even browning on the whole surface, no matter if you're using a single rack or several racks at the same time.

StepBake

Perfect food in 2, 3 or more steps

Cooking in phases is achieved by manually programming the many steps of the baking process. Throughout all the steps of the automatic cooking process there is no need to change the settings manually. It is also ideal for more experienced users and for dishes like bread and lasagne, which need temperature changes.

MultiFlow 360°

All sides are good sides

MultiFlow 360° guarantees the optimal circulation of heat within the oven. Due to smartly positioned ventilation openings on the back wall and the unique round shape, air is spread evenly throughout the oven. The fan pushes hot air around the entire oven volume, making the food perfectly baked on all sides. The dynamic air movement allows simultaneous baking on many levels without smells and flavours mixing together.

MultilevelBaking

Many dishes in one go

Combination of **MultiFlow 360°** and **HomeMade** shape in some models of Gorenje ovens helps reach the toughest objective: preparing up to five trays of dishes at once. The good news is: the flavour and smells don't mix. Smart air distribution ensures that the food is evenly baked on every level. Since the oven volume is larger, the overview is excellent as well.

SuperSize

Ready for XXL recipes

More spacious ovens allow you to cook a larger quantity of food – not only because of even air circulation at all levels, but also because of the 46cm wide baking trays in both standard and compact ovens. Innovative solutions allow a larger interior and the oven width is fully used. There is more space on each baking tray and the superior technology makes sure the food is cooked evenly on all levels.

PerfectGrill

A double heater for evenly crispy food

The best baking results are achieved with a combination of larger and smaller heaters, where the latter is positioned inside the larger one. The smart positioning of the heaters allows optimal heat distribution and provides the ultimate baking results every time, so food is crispy on the outside and soft on the inside. A variable heater combination can use either the inner or outer heater, or both at once. In advanced models, the heater is movable for easier cleaning and maintenance.

AutoRoast

Perfectly roasted

The AutoRoast function first heats the oven to 230°C. The food is roasted for 30 minutes and then the temperature drops to the set level. A smart combination of time and temperature creates ideal roasting conditions. As a result, meat is crispy and well done on the outside and perfectly soft and tender on the inside.

Dehydration

Great food, always at hand

Dried fruit, vegetables, herbs and meat can be easily prepared at home. Dehydration is possible on up to 5 shelves at the same time, which saves time and energy.

Yoghurt

A simple way to healthy stuff

A special function enables healthy yoghurt to be prepared at home. Automatic temperature and time settings provide optimal conditions that create homemade yoghurt in around 3 hours. This function requires the use of additional Gorenje accessories.

FastPreheat

Charmingly fast, saving time and energy

The oven reaches a temperature of up to 200°C in just 6 minutes, saving 30 % of the time needed by standard preheating. This comes in handy for recipes that require a preheated oven. A light and sound signal informs when the temperature is right.

SlowBake

A very slow way to perfection

SlowBake bakes food at low temperatures for up to 6 hours. Due to the long preparation periods, meat and fish are softened but retain their juiciness, aroma and nutrients.

MeatProbe

Perfectly roasted, every time

By controlling the temperature inside the meat, the MeatProbe manages the entire process and even activates the alarm when the time is right.

TelescopicGuides

Inside, helpfully coming outside

Smooth running telescopic guides provide a perfect overview of the process on all levels. This means safer and easier removal and cleaning. Gorenje ovens feature fully pulled out guides on three levels in Superior line. During the pyrolytic cleaning, they should be removed from the oven.

UltraCoolDoor

Made to be touched – anytime, all the time

Special triple or even quadruple glazing isolates the oven, making it even safer for children and pets. The heat is kept inside, optimising energy consumption by stopping heat escaping from the oven.

GentleClose

A soft touch is enough

Only a soft touch is needed to close the oven door smoothly, without any noise.

DC+ system

Effective heat management

The **DynamiCooling** system efficiently cools the oven exterior (or housing) to prevent any damage caused by high temperature. In ovens with the **DynamiCooling+** system, the heat sensors regulate the cooling of the oven exterior walls until they reach a temperature of 60 °C. This is particularly convenient in ovens with the pyrolytic cleaning function which works with extremely high temperatures.

BigSpace

More space for greater cooking freedom

The new generation of Gorenje ovens conceals a shape within the upper part. Now the optimised airflow circulates inside at an even greater volume, circling completely freely. The increased capacity allows preparation of larger baking trays and larger quantities of food, while their outside dimensions remain the same. Instead of the previous 3, the Superior oven now enables using 5 levels at the same time. Capacities range up to 73l in standard ovens and up to 50l in microwave ovens, which is amongst the largest available on the market.

SilverMatte

Ultra resistant, ultra smooth coatingt

Enamel quality and type are exceptionally important for the oven and its operation. **SilverMatte** is a highly resistant and strong material that can stand extreme heats, even pyrolytic cleaning at 500 °C. Free from micro pores, it coats oven surfaces and baking trays, making them resistant to the highest temperatures, microwaves and steam. The triple coating of the interior supports heat reflection and provides additional insulation. Therefore, the oven interior always stays sterile and safe.

CataClean

A surface that allows no grease

Catalytic cleaning represents a great assistance in oven maintenance. When the oven reaches 85°C or more during the baking process, catalytic panels automatically start absorbing the grease and impurities.

AquaClean

Simple, casual cleaning

Due to completely new enamel in all lines of new Gorenje ovens, **AquaClean** function has been significantly improved. **AquaClean** offers great assistance in cleaning the oven cavity. All it takes is to pour half a litre of water into a baking tray and turn **AquaClean** on after each baking. In just 30 minutes, the results are visible on the entire surface and the baking trays. Stains and grease are softened and can be easily wiped away.

STEAM ROASTING FOR HEALTHY, YET DELICIOUS EATS.

Heat

Steam

PureSteam

There is so much hype around healthy food so why not try our **PureSteam** technology. Its superb steaming performance uses steam without any water droplets, making the food crunchy on the outside and amazingly tender on the inside. It locks in all the nutrients and keeps the original texture. It works great even when defrosting or reheating.

MultiSteam 360°

Juicy on the inside, crunchy on the outside

The same ventilation system used in conventional ovens, **MultiFlow 360°**, is used in steam ovens. After the steam enters the oven cavity through multiple openings, a special fan distributes the steam evenly, giving the food a soft and tender feel. One water tank is enough for the entire cooking process so no additional opening of the oven is needed, saving time and energy and improving the overall steaming results.

Steam advantages

- › Lower fat content
- › cook everything through steaming
- › steam different foods at once
- › retain more nutrients in food
- › avoid overcooking food

SousVide

SousVide means a simple, yet magical trick: cooking inside vacuum bags. Food is prepared in a way that preserves vitamins, minerals and other nutrients. Since the food is prepared in a vacuum and at low temperatures, the inside of the meat is always juicy and tender while vegetables stay smooth and firm. This process is available in Gorenje compact steam ovens.

**VITAMINES
& NUTRIENTS
PRESERVED**

HealthyReheating

Evenly reheated or defrosted

Combi steam oven can be used to reheat or defrost dishes. When the food is reheated, it is not additionally cooked, and it never dries out. Defrosting is uniform and gentle enough not to alter the structure of the food. Therefore, defrosting and reheating in a combi steam oven is simply healthier.

Descaling

Limescale is not a problem

The **descaling** function operates automatically. When needed, it reminds the user to run the descaling process. After a special descaling solution is added, it takes only 1 hour to complete the process.

WaterTank

Water at hand

The large, practical and elegant **water tank** is easily accessible and can be refilled even during the cooking process, without ever interrupting it. The 1.3l tank is smartly positioned for easier handling and designed to offer more space and prevent spilling. The capacity is sufficient for the longest steaming programmes. It can be easily dismantled and cleaned in the dishwasher.

COMPACT MICROWAVE OVEN

DELICIOUS DISHES FASTER AND EASIER

Heat

Microwaves

MultiUse

Sometimes it just makes sense to use all the help technology provides. If using microwaves, combined with a conventional oven and a little grilling on top - at the same time on the same dish — well, why not, right? That's why we developed **MultiUse**. If you have large chunks of white meat, combine grill and heat simultaneously for yummy results, while the grill and microwave combined will roast smaller chunks of meat or bake pizzas in no time!

StirrerTechnology

Trays of all sizes are welcome

The **Stirrer technology** permits a standard-size baking tray to be placed in an oven. The oven's entire width is used, saying goodbye to conventional turntables and uneven heating. The advanced microwave distribution system heats the food uniformly across the entire volume.

Inverter technology

Gentle treatment for tastier food

Because of Inverter technology the energy is evenly distributed instead of pulsating. As a result, the food retains its initial structure, including its vitamins, minerals and fibres. The advantages of the even energy distribution are particularly welcome when reheating or defrosting, and when cooking liquids. The overall microwaving time is shorter, which lowers energy consumption as well.

**WE'LL
DO THE
COOKING.
YOU DO
THE LIVING.**

OptiBake BUILT-IN OVENS

How about perfect baking results every single time? To achieve this goal, we search for inspiration in wood burning ovens. We come up with **HomeMade** shape that has been completely revamped and the airflow perfected due to a new heater design and the improved distribution of the ventilation openings. The temperature is stable throughout the oven and never again will your dishes be burnt on one side and underdone on the other.

New Gorenje OptiBake ovens offer you an abundance of features that will make cooking easier and more enjoyable, but most of all less time consuming.

Let us take care of the cooking while you enjoy living!

EVENLY BAKED EVERYTIME

HomeMade shape

Gorenje ovens are well known for their innovative rounded cavity, which has been their distinctive feature for many years. The HomeMade shape was inspired by the traditional wood burning ovens and ensures better circulation of air compared to competitors. Now, the HomeMade shape has been completely revamped and the airflow perfected due to a new heater design and the improved distribution of the ventilation openings. That is why the temperature is stable throughout the oven. Never again will your dishes be burnt on one side and underdone on the other.

FastPreheat

For last minute inspiration

OptiBake ovens reach a temperature of up to 200 °C in just 5 minutes, saving 30 % of the time needed by standard preheating and making them one of the fastest ovens on the market. This is very convenient for recipes that require a preheated oven. A light and sound signal informs you when the temperature is just right.

BigSpace

77 l volume

Ready for XXL recipes? Innovative design solution allows a larger interior, and the oven width is fully used. There is more space on each baking tray and the superior technology makes sure the food is cooked evenly on all levels.

AirFry

For healthy indulgences

Now you can have the crispiness and tastiness of fried food without the extra calories. This method of extremely intensive baking with hot air doesn't require any fat to ensure that perfectly delicious crunchy golden crust. In combination with special perforated baking tray, (depending on the model), that perfectly encapsulate the dish all around, you will achieve even better results. Suitable for small cuts of meat, fish, vegetables and pre-prepared frozen products, like French fries and chicken nuggets.

StepBake

Perfect food in 2 or 3 steps

StepBake allows the cook complete control of the baking process, which can be manually programmed. Simply set the parameters for each of the desired 2 or 3 steps and the oven will take care of everything. No further interaction needed, all that's left for you to do is enjoy the final result.

Pizza function

Best pizza in town

This programme with setting of baking temperature up to 300 °C was specifically designed to help you bake the perfect pizza, focaccia, flatbread and similar baked delicacies.

AutoBake

When you don't know how

Gorenje OptiBake ovens provide fully automatic cooking programs with 22 of the most popular recipes to choose from, just ideal for beginners. Extensively tested by Gorenje experts, the AutoBake programmes are fail-safe, delivering great results even without preheating. All that the user needs to do in few cases is choose the dish type and weight and press start. The oven will do the rest.

SteamAssist

For the perfect crunch

By adding the water into the water tank in the control panel you'll get perfect steamed food and crunchy crust. When choosing a programme, which is having the possibility to add steam in the baking process, the oven will let you know when the time is right. Depending on the model of the oven, you have to press a central knob or either touch the function on the display to activate the steam injection.

ExtraSteam

The simpler way to bake with steam

This programme creates the perfectly steamed environment that ensures your bread will have a high rise and crunchy crust. All you have to do is put some water into a shallow tray, select the ExtraSteam programme and let the oven do the work.

GentleBake

For super tender and juicy food

This function is all about gentle, slow and even baking. This way, the moisture is locked inside and the food stays staying super tender and juicy. Suitable for preparing meat, fish or pastry on one level.

FrozenBake

The fastest way to bake frozen goodies

This efficient baking programme is the perfect choice for all frozen food and pre-prepared meals.

Telescopic Guides

For easy and safe handling of baking trays

Smooth running telescopic guides provide a perfect overview of the baking process, as well as safer and easier handling of baking trays. Depending on the model, Gorenje OptiBake ovens feature $\frac{3}{4}$ extendable telescopic guides on one or two levels. As an additional option we are also offering flexible one level telescopic guides that can be simply clicked on the desired level of wire guides.

MultiLevel Baking

When you want to make it all

Combination of smart air movement, evenly distributed spaces between the tray positions and special slightly rounded cavity ensure the food is evenly baked on every level and since the oven volume is larger, the overview is excellent as well.

PerfectGrill

A double heater for evenly crispy food

The best baking results are achieved with a combination of larger and smaller heaters, where the latter is positioned inside the larger one. The smart positioning of the heaters allows optimal heat distribution and provides the ultimate baking results every time, so food is crispy on the outside and soft on the inside.

Gratin

For the tastiest golden crust

The Gratin option lets you create the perfectly golden brown crust on lasagnas, meat, potatoes au gratin and other au gratin dishes.

BakeSensor

Perfectly baked, every time

By controlling the temperature inside the food, the BakeSensor manages the entire process and even activates the alarm when the dish is done.

Perforated enameled tray

For all your airfried masterpieces

The perforated enameled tray allows an increased flow of hot air, making all your airfried dishes extra crispy and delicious. At the same time it is also appropriate for steaming the dishes in ovens featuring SteamAssist function.

MaxView

Always know what's going on

Did you know that opening the door during baking time causes the temperature in the oven to drop and can even ruin the dish? Due to a maximized size of door window, excellent halogen lighting, and improved baking level positioning, the new OptiBake ovens afford a complete overview of the baking process at all times without opening the door.

GentleClose & GentleOpen

Let your cooking make the noise

Only a soft touch is needed to open or close the oven door smoothly, without any noise.

PyroClean

Premium self-cleaning function

Pyrolytic cleaning is the most efficient way to clean an oven with extremely high temperatures that leave the oven spotless. To ensure safety, the oven is locked during and immediately after the cleaning process and when it cools off, you just have to wipe away the leftover ash with a damp cloth.

DC+ System

Effective heat management

The DynamiCooling system efficiently cools the oven exterior (or housing) to prevent any damage caused by high temperature. In ovens with the DynamiCooling+ system, the heat sensors regulate the cooling of the oven exterior walls until they reach a temperature of 60 °C. This is particularly convenient in ovens with the pyrolytic cleaning function which works with extremely high temperatures.

Quadro Ultra CoolDoor

Safe and energy efficient

Special quadruple glazing isolates the pyrolytic ovens, making it even safer for the users, especially if they have children or pets. Additionally, since the heat is kept inside, energy consumption is optimized, making the oven wallet- and environment-friendly.

Child safety

When you need to step away for a moment

Care for the children makes Gorenje OptiBake ovens extra family-friendly. Leaving kids in the kitchen unattended is now safer, as a mechanical door lock prevents them to open the oven door anytime.

CataClean

A surface that allows no grease

Catalytic cleaning represents a great assistance in oven maintenance. When the oven reaches 85 °C or more during the baking process, catalytic fan cover automatically start absorbing the grease and impurities.

Removable glass door

Easy acces, easy cleaning

Door glasses can be easily removed, ensuring easier cleaning and therefore always superb view into the oven.

AquaClean

Simple, casual cleaning

AquaClean offers great assistance in cleaning the oven cavity. All it takes is to pour half a liter of water into a baking tray and turn AquaClean on after each baking. In just 30 minutes, the results are visible on the entire surface and the baking trays. Stains and grease are softened and can be easily wiped away.

CoolDoor

Safe and energy efficient

Special innovative construction and glazing on the door isolates the oven, so the heat is kept inside, optimizing energy consumption as heat can't escape from the oven cavity. This makes the oven even safer for the user, children and pets and prevents warming up the ambient.

ALL ABOUT YOUR OVEN AT YOUR FINGERTIPS

ConnectLife

Why bothering, when you can simplify your life having all possibilities to control and check your oven via app on your mobile device?

Remote control, recipes, mobile notifications, voice control and ticketing are functionalities that will help you manage all oven operations smoother and faster from wherever you are.

ConnectLife – Remote control

Simple control of your oven from anywhere

Now kids won't wait for you anymore having lunch and you being late from your job or busy outside the house. You can turn your oven on or off simply with your mobile device from your office, car, back yard or elsewhere.

ConnectLife – Notifications

Informed anytime about your oven activities

No matter where you are and what you are doing, you will be always immediately notified on your mobile device when your oven has finished with the baking process.

ConnectLife – Recipes

Many culinary ideas adjusted to functions and settings of your oven

Availability of many different recipes you can choose from and can be sorted by ingredients, specific dietary requests and simply adapt to your needs. At the same time all the oven functionalities are already adjusted to specific recipe, even when multiple baking steps are required, so you don't have to think about the process and settings to make a perfect dish.

ConnectLife – Voice control

Simple voice commands with digital assistants

Dirty hands while making bread dough and you already want to preheat the oven? No problem, as you can control your oven also with your voice with a support of digital assistants such as Amazon Alexa or Google Assistant. Just say it and it will be settled.

ConnectLife – Appliances dashboard

Constant insight into your smart appliances statuses

Having control and constant information what is going on with your oven is really a stress-free thing. No matter where you are, you can also always check warranty, user manuals and other important stuff immediately on your mobile device.

ConnectLife – Ticketing

After sales support and FAQ at your fingertips

You can easily manage your oven issues with immediate access to our "Frequently asked questions" database on the app. And if you don't find the answers there and solve the issue by yourself, you can contact our after sales support directly from the app. And what is even more convenient, you don't have to think about your oven data and some product codes, that are usually requested for the after sales service, as all necessary data would be simply sent from the app directly.

NOTHING BUT PLEASURE

COFFEE MACHINES

AROMA & GREAT TASTE

Perfect coffee is a serious challenge. Coffee beans need to be ground carefully, water temperature and the pressure needs to be set with precision, milk has to be warm enough and foamed to perfection. Nevertheless, a coffee cup shouldn't be cold either. Gorenje coffee machines will make mornings more enjoyable. Thought out coffee making process will extract the optimal flavor and create the enchanting smell that will bring a perfect start of the day.

CoffeeBean

Easy mornings

The coffee bean container is easily accessible as it can be pulled out. When needed ground coffee can also be used instead of beans. When the machine runs out of coffee beans, a warning will appear on the display.

EasyMilk

Creamy milk foam always at hand

Gorenje coffee machines feature a large milk container for cappuccino or latte, both can be prepared with desired amount of milk. A large milk container allows several cups of hot milk to be made without the need to refill. It is easily removable and can be simply pulled out and stored in the refrigerator until the next time you need it.

‘WOW! COOKING JUST GOT SMART’ MOMENTS

Enjoy fully automatic cooking, fast and healthy thanks to smart technology. Boiling, grilling, warming and melting are simple and safe.

EXPERIENCE COOKING WITH STYLE

BUILT-IN INDUCTION HOBS

Whether preparing a meal for yourself or cooking for the whole family, Gorenje induction hobs deliver a truly streamlined cooking experience every time. With a myriad of finely tuned features that simplify your interaction with the cooking surface, preparing meals has never been more simple, intuitive or convenient.

Smart, precise and flexible.

PowerBoost

Cooking on fast-forward

The **PowerBoost** function intensifies heating, resulting in significantly less heating-up time. It takes just 5.7 minutes to boil 2l of water from 15°C to 90°C, which is half the time of regular electric hobs.

StopGo

Taking a break, anytime

The **StopGo** function stops the cooking and continues with the same settings after being re-activated.

NO MORE
BURNT
FOOD

SoftMelt

One, two, chocolate

The **SoftMelt** function gently melts chocolate or butter at a constant temperature of 42°C, thereby creating perfect conditions for melting, without burning.

Recall

Reactivate your settings

This function is very helpful, when you turn off the hob unintentionally. You have 5 seconds to recall your last used settings on the hob, which becomes very handy when you're cooking more than one dish. Within 5 seconds after you accidentally turned off the hob, turn on the hob again and within next 5 seconds press **StopGo** function.

ENJOY YOUR COOKING

BUILT-IN GLASS CERAMIC HOBS

Generation of glass ceramic hobs offers many features for fast, convenient and efficient cooking. Efficient and simple, as today's kitchen should be. Because every moment counts, whether preparing a meal or enjoying it with your loved ones.

Make your kitchen moments memorable.

FishZone

An oval cooking zone, perfect for wider pots

Induction and HiLight hobs have an expanded zone called a **FishZone**. When turned on, the traditional round cooking zone turns into a larger and oval surface that is especially suitable for wider pots.

StayWarm

Staying perfect for the latecomers

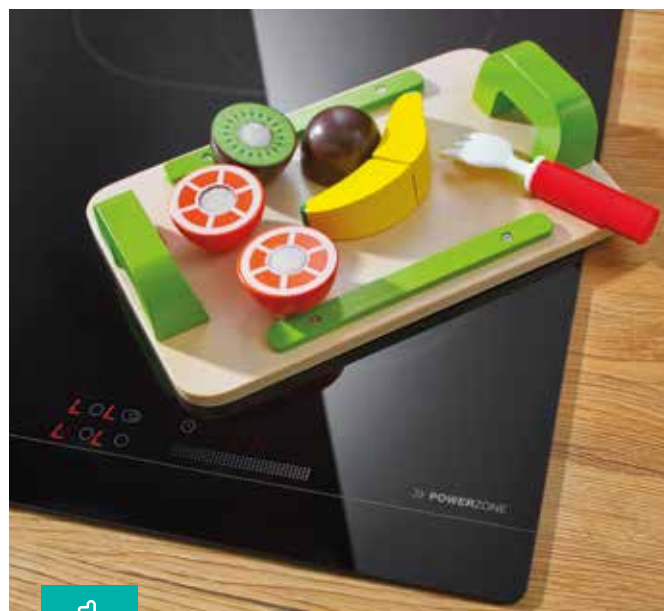

The **StayWarm** function keeps food at a constant temperature of 70°C until the time is right to serve the meal. The food retains its original flavour and temperature until it is served.

Timer

Somebody always on the watch

The countdown timer can be set for up to 99 minutes. If the optimum cooking time for a particular dish is known from experience, the timer can be set and the hob will switch off automatically when completed. A beep will signal that the food is ready.

ChildLock Pro

Always safety first

ChildLock Pro function is made specially for families with small children. Leaving the kids in the kitchen unattended, has never been safer since this option prevents them turning on the hob. It will automatically lock the hob at every switch-off. Otherwise you can lock the hob by pressing the symbol.

SPARK YOUR CREATIVITY

BUILT-IN GAS HOBS

Cooking like a chef can be simple. All it takes is a creative spark as your **Gorenje gas hob** will take care of everything else. With its **big surface**, **powerful burners** and **advanced features**, it offers support for your wildest cooking endeavours.

Spark your creativity and surprise your loved ones.

BigSurface

Plenty of space for every pan or pot

Enlarged cooking surface (up to 20%) and longer distances between burners offer plenty of space for all sizes of pans and pots. Sleek and flat design allows easy sliding and using very big pots without disturbance, with perfect stability for all your cooking adventures.

Cast iron ProGrids

Strong, stable and durable support

Massive and elegant cast iron ProGrids are extremely stable and resistant even to the highest temperatures. They bring superior stability, durability and user-friendly design to your kitchen.

ChefBurners

More powerful and efficient cooking

New high-efficiency **ChefBurners** provide more efficient gas consumption and enable faster and eco-friendlier cooking. Different sizes of burners give you full flexibility, while their user-friendly positioning enables easy and safe cooking.

WokBurner

Powerful cooking, great authentic taste

New wok burner with special shape of gas crown directs flame directly to wok and enables even more powerful cooking with up to 4.0 kW power. Asian cuisine, vegetables and other dishes have never been so crisp and delicious, yet done so quickly.

Wok Cradle

For really authentic results

Massive and stable wok cradle fits perfectly to the grid and offers safe and convenient use of the wok for best cooking results.

**100%
SAFE**

GasStop

Full stop, full safety

If during cooking the flame gets extinguished for any reason (wind, liquid spillage), there is no need to worry. Automatic GasStop flame failure device will cut off the gas supply immediately to ensure full safety.

One hand ignition

Simple and convenient

One-hand burner ignition brings extra comfort and easy control to your gas hob. To activate the gas burner simply press the knob down and rotate it to desired level with one hand while your other hand is free. Quick, simple, and efficient.

Easy Clean

Effortlessly shiny

Special brushment of inox enables less scratches and fingerprints on the hob surface. At the same time flat and modern design of the drip tray makes it quick and easy to clean and maintain.

‘NOT EVERYONE IN THE HOUSE SHOULD KNOW’ MOMENTS

Our self adjusting, silent hood traps cooking smells and steam. Keep the aroma of great food on your plate not in your entire home.

Gorenje hoods bring two in one as they are technologically advanced tools in the form of superbly designed objects. They are a perfect companion to a modern lifestyle – they contribute to a healthier living environment, efficiently remove bad smells and work silently and reliably. Gorenje hoods are made of top quality materials and offer the best user experience whilst cooking, cleaning or simply just watching them.

Keeping the air clean.

SUPER EFFICIENT SUCTION LEAVING NO ODOURS

**NO
BAD
ODOURS**

AdaptAir Pro

Sometimes you can sense there are delicacies in the kitchen being prepared, and it's not always pleasant. But finally, with **AdaptAir Pro**, you can say goodbye to unpleasant cooking smells thanks to its patent pending technology. The suction power is evenly distributed across the entire filter opening, even at the lowest speeds, efficiently extracting odours, steam and other impurities from the air in your kitchen, including from your cabinetry around the hood. Better distributed sucking also means less required cleaning.

Polyurethane filter

Benefits of polyurethane foam

Unique aluminium grease filters are enhanced with a special polyurethane foam that eliminates up to 98% of all grease particles and other impurities. At the same time, the hood maintains its absorption efficiency.

LedLight

**FUNCTIONAL
& AESTHETIC**

Perfect overview over your cooking

Some say once you try LED lights, you never go back. And why should you? LED lighting, as built-in selected hoods not only provides stronger, better illumination, it does all that by using as little as 10% of energy and its lifespan is 30 times longer compared to traditional lights.

PowerBoost

For extra powerful ventilation

Activate the PowerBoost function to immediately remove excess steam bursting out of a pot. Select Gorenje+ hoods feature continuous SliderTouch power control with two power boost settings.

TouchFree coating

Shiny and fingerprint-free finish

All stainless steel surfaces are coated with a special TouchFree film that prevents fingerprint markings, leaving the surface always shiny and making cleaning much easier.

Gentle close

Smooth closing

Some pull out hood models now feature a new comfortable way of closing - just like the kitchen furniture. The new GentleClose function enables simple, silent and elegant closing. A gentle push is enough for the hood to softly retract to its housing.

Clean filter indicator

Instant information

Cleaning is an important factor in prolonging the useful life of your kitchen hood and its filters. Latest models feature a sensor that is able to perceive when the filter is saturated with grease particles to the extent when optimum hood performance is impaired. A light symbol on the control panel will alarm you that it is time to clean or replace the filter (for hoods with charcoal filters).

'CRAVING SOMETHING NUTRITIOUS' MOMENTS

The perfectly ionized microclimate with optimal air circulation keeps food fresh longer and full of vitamins and nutrients.

Healthy meals assured.

FRESH – NO MATTER WHAT

IonGeneration FRIDGE FREEZERS

Gorenje fridge freezers are designed for maximum freshness. Their **IonAir** with **MultiFlow 360°** technology continuously refreshes the air to simulate the natural microclimate and provide perfect storage conditions. With smart, user-friendly functions they seamlessly adapt to your lifestyle. No matter how often you open the fridge door, **AdaptTech** maintains the optimal temperature and keeps your food in perfect shape, while the **NoFrost Plus** cooling system prevents the accumulation of frost and eliminates defrosting.

Keeps your food healthy and tasty.

KEEPS ALL OF THE NUTRIENTS AND PROLONGS FRESHNESS

IonAir & Multiflow

A++

TOP ENERGY
EFFICIENCY

Food and groceries should remain crispy fresh even if they sit in the fridge for a longer period, right? **IonAir** ensures just that. The technology emulates the natural ionisation process. Negatively charged ions mimic the microclimates found in nature which means that food is preserved incredibly fresh and keeps all of its nutrients. The **Multiflow 360°** ventilation system distributes the natural microclimate across all 14 ventilation slots and maintains a constant temperature on all shelves.

IonAir

- Negatively charged ions are generated inside the appliance
- Ideal environment for food preservation because of refreshed air

Multiflow

- Easy distribution of ionised air due to 14 ventilation inlets
- Even temperature on every shelf

- › Decreases odours & smells
- › Cleaner air in the fridge
- › Enhanced freshness and healthy food condition
- › Reduces food spoilage
- › Lower power consumption

YOUR FOOD STAYS FRESH FOR LONGER WHILE SAVING ENERGY

With **AdaptTech**Without **AdaptTech**

AdaptTech

The late-night trip to the fridge. You find the cake and start your internal monologue - with the fridge door open. The temperature suddenly rises and causes a thermal shock. This causes the food to spoil sooner. Thankfully, our **AdaptTech** technology continuously monitors and learns your habits. So, it can predict your trips to the fridge and decrease the temperature by 1 or 2 °C so your food stays fresh and full of nutrients.

Inverter Compressor

Steady, silent, and durable

Compared to a conventional compressor, inverter compressors adapt better and faster to any changes in the fridge temperature, making them more efficient and economical. They also have a longer useful life and a lower noise level.

optimal
temperature

INVERTER COMPRESSOR

GENERAL COMPRESSOR

INVERTER
COMPRESSOR
BENEFITS

Super silent
Extra energy savings
Longer lifespan

CrispZone with HumidityControl

**CRISPY
VEGGIES
& FRUITS**

Just like garden-fresh

CrispZone is one of the largest fruit and vegetables bins in the market. Low temperature and the option to adjust the humidity extend the freshness of your produce.

FreshZone drawer

Fresh as if straight from nature

The drawer with the lowest temperature in the refrigerator is ideal for storing meat, fish, fruit, and vegetables. It will preserve the food's freshness, aroma, colour, and flavour for much longer.

SuperCool

Rapid cooling after weekly shopping

The intensive cooling function drops the refrigerator temperature to 3 °C, which is lower than usual by nearly a half. Combined with large refrigerator compartment volume, this temperature is ideal for rapid cooling of food after major shopping trips. After six hours, the function is switched off automatically and the refrigerator compartment temperature returns to the initial setting.

SimpleSlide shelves

For both tall and short bottles

Height-adjustable shelves in the refrigerator door can be easily moved up or down to accommodate up to 5 kilograms of food of different shapes or sizes.

300 L

storage space
in just **2 hours**

THERE'S NO BETTER SOLUTION WHEN YOU URGENTLY NEED MORE FRIDGE SPACE

ConvertActive

It's my party and I'll do what I want to - yes, even turn the freezer into a fridge! Imagine you've got a big party planned, but not enough space to cool the drinks... No sweat! Our **ConvertActive** technology lets you turn the freezer compartment into a refrigerator compartment or large **ZeroZone** drawer simply by pressing a button.

SensoTech

Advanced control via LED display

Advanced control via LED display allows accurate settings of temperature in the refrigerator and the freezer compartment from the Superior line. Features like **XtremeFreeze**, **FastFreeze**, **SuperCool**, and **EcoMode** can be switched on by a gentle touch of the relevant symbol. A special signal light and an audible signal warn the user of a sudden increase of the temperature in the appliance.

NoFrost Plus

No more tedious defrosting

One of the best cooling systems in the market, installed in the freezer compartment, prevents the accumulation of ice and frost to keep the power consumption low, while in the refrigerator compartment, it maintains an ideal microclimate for fresh food. Circulation of ionized air prevents the food from drying out and retains its vitamins and minerals.

XXL SpaceBox

Enough space to store a turkey

This freezer compartment drawer is the largest in the appliance and it is ideal for storing large items like a turkey, several pizzas, or even cakes.

FastFreeze

Rapid freezing

The FastFreeze function freezes the food at -24°C to preserve most of the minerals in the food. After approximately 2 days, the function is switched off automatically and the freezer compartment temperature returns to the initial setting. And in case you forget, smart sensors make sure the function is switched on at the right time.

XtremeFreeze

Best nutrients preservation

When this function is activated, the food placed in a special drawer in the freezer compartment will be frozen in half the usual time. Rapid freezing at extremely low temperatures below -30°C leads to formation of microcrystals that, unlike in case of slow freezing, do not damage the cellular structure of the food. The shock-approach to freezing thus preserves all nutrients and the flavour of the food. After approximately 1 day, the function is automatically switched off and the temperature in the drawer returns to the initial setting.

A PLACE FOR EVERYTHING

SIDE BY SIDE FRIDGE FREEZERS

Side by side fridge freezers are the ultimate choice for anyone who wants a convenient and efficient way to preserve the freshness of their food. Combining modern design with powerful technology and a spacious interior, these appliances offer easily accessible and well-organized storage for all your groceries. Due to their larger volume they ensure less shopping trips and even help reduce food waste thanks to a better overview of the stored items. It's no wonder, that you will fall in love with them instantly.

Well organized space for perfect overview.

TwistIce

Ice whenever you need it

There's always enough ice in the freezer with the **TwistIce** removable internal ice maker. Simply twist the handle and enjoy a chilled drink.

InverterCompressor

Steady, silent, and durable

Inverter compressors are quieter, more durable and consume less energy as compared to a conventional compressor. They adapt better and faster to temperature changes inside the refrigerator, for example when the door is opened, which means less temperature fluctuations and better storage conditions for your food.

XtraSpace

Practical and spacious

Efficiently designed interior offers enough space for larger quantities of food, saving you the frequent shopping trips. The food can be easily organized on glass shelves, in large drawers, or the bins on the inner wall of the door, meaning you can always see what's available and waste less.

LedLight

Well-arranged and efficient

LED lighting in refrigerators provides excellent and highly efficient illumination as it has a much longer useful life and uses significantly less power than conventional light bulbs.

A photograph of a modern kitchen interior. On the left, a white refrigerator is open, revealing its interior shelves stocked with various fruits and vegetables. In the foreground, a person's arm and shoulder are visible, sitting at a wooden table with a glass bowl of food. The background shows a clean, minimalist kitchen with white cabinetry and a light-colored floor. A large teal overlay covers the right side of the image, containing the main text.

‘JUST LIKE GARDEN FRESH’ MOMENTS

The perfect combination of temperature, automated humidity control and special light allow your fruits and veggies to keep ripening. **Fresh and tasty choice within reach.**

FULL OF NATURAL FRESHNESS

NatureFresh FRIDGE FREEZERS

When it comes to producing food that is fresh, full of taste and rich in nutritional value, nature has always known best. It provides just the right combination of sunshine, fresh air and moisture for optimum growth and maximum flavour.

That is why the **NatureFresh** built-in fridge freezers from Gorenje mimic the natural conditions by maintaining the photosynthesis process, controlling the humidity levels and providing fresher air. Additionally, Gorenje NatureFresh built-in fridge freezers have high energy ratings, ranging from A+ to A+++ and their modular and flexible design ensures they will suit every lifestyle perfectly.

Perfect storage conditions for a healthy living.

GOOD FOOD DESERVES GOOD PRESERVATION

IonAir with DynamiCooling

LONG-LASTING
FRESHNESS

What if your food — especially veggies and fruits — could retain their crispy fresh taste and all the nutrients even after days in the fridge? Easy, thanks to **IonAir**, providing air enriched with negatively charged ions mimicking the microclimate found in nature, combined with **DynamiCooling**, the advanced fan system equalises the temperature throughout the entire refrigerator and evenly distributes ionised air. This delivers complete flexibility, as you can place any type of food on any shelf.

Top energy efficiency

All Gorenje fridge freezers are highly energy-efficient. Excellent thermal insulation and door sealing, inverter compressor, and electronic or mechanical control efficiently reduce power consumption. Fridge freezers with the **A++** energy efficiency rating use 40% less power than those in the A class.

GARDEN-FRESH VEGGIES & FRUITS

CrispZone with VitaLight and SmartHumidity

**AUTOMATICALLY
ADJUSTED
HUMIDITY**

For lovers of veggies and fruits there's hardly a greater sense of joy than having a fridge full of freshly picked garden produce. Our three combined solutions provide the garden fresh & crisp quality of produce for significantly longer. The **CrispZone** drawer maintains a low temperature, while the **SmartHumidity** system keeps the humidity at an optimum level. Finally, VitaLight is a special light that maintains the ripening process to ensure that no vitamins are lost.

FreshZone

Fresh as if straight from nature

The drawer with the lowest temperature in the refrigerator is ideal for storing meat, fish, fruit, and vegetables. It will preserve the food's freshness, aroma, colour, and flavour for much longer.

RECOGNIZES
YOUR HABITS

STAYS
FRESH NO
MATTER HOW
FREQUENTLY
YOU OPEN
THE DOOR

AdaptTech

The late-night trip to the fridge. You find the cake and start your internal monologue - with the fridge door open. When opening the fridge door temperature suddenly rises and causes a thermal shock. This causes the food to spoil sooner. Thankfully, our **AdaptTech** technology continuously monitors and learns your habits. So, it can predict your trip to the fridge and decrease the temperature by 1 or 2 °C so your food stays fresh and full of nutrients.

SuperCool

Rapid cooling after weekly shopping

The intensive cooling function drops the refrigerator temperature to 3 °C, which is lower than usual by nearly a half. Combined with large refrigerator compartment volume, this temperature is ideal for rapid cooling of food after major shopping trips. After six hours, the function is switched off automatically and the refrigerator compartment temperature returns to the initial setting.

PERFECT
OVERVIEW

MixBox

Keep your fridge neat and tidy

This shallow drawer will store all your smaller items, like spreads, butter, fish cans and snacks making sure your fridge is organized and food doesn't stay forgotten past its due date. Its slide in-and-out function ensures easy access to its content.

MultiBox

Multi-functional, practical box

The multi-purpose bin with a cover in the refrigerator door can be used for storing cheese, onions, and other food with a pungent smell. It keeps the food fresh and protects it from drying, while the silicone cover can be used as an egg or ice tray.

MultiAdjust shelves

Endless storage possibilities

These sturdy glass shelves can be very easily adjusted in position, inserted into the fridge or taken out, thereby allowing you complete freedom to adjust the fridge interior according to your specific needs. The tempered glass shelves are highly durable and will securely carry even larger amounts of food.

LedLight

Well-arranged and efficient

LED lighting in refrigerators provides excellent and highly efficient illumination. Its useful life is thirty times as long as that of conventional light bulbs, and it saves up to ten times as much power.

SMART
& HANDY

HiddenSpace

Extra storage out of sight

The **HiddenSpace** compartment provides extra hidden storage for cans or similar items underneath the CrispZone drawer.

Deep door Bottle shelf

Secure storage for bottles

Refrigerator door has plenty of storage for the largest glass or plastic bottles. A special fence holds the items in place to prevent it from moving and damage while the door is opened or closed.

OPTIMUM DOUBLE AIR CIRCULATION SYSTEM

NoFrost DualAdvance

Intensive circulation of cool air in the freezer compartment reduces the humidity level and prevents accumulation of frost on the food and ice on the freezer walls. In the refrigerator compartment, it provides optimum food storage conditions. This leads to optimum cooling and freezing control, each adjusted to the respective processes in the two separate parts of the appliance.

NO FROST
NO PROBLEMS

NoFrost advantages

- › No more time-consuming freezer defrosting.
- › Quality frozen food storage – it keeps all the nutrients.
- › Frozen food will no longer stick together.
- › Better overview of the contents.
- › More useful space.
- › No exchange of odours between the freezer and refrigerator compartment.

FastFreeze

Rapid freezing

The **FastFreeze** function freezes the food at -24°C to preserve most of the minerals in the food. After approximately 2 days, the function is switched off automatically and the freezer compartment temperature returns to the initial setting.

**115°
OPENING**

Flat hinge

Easier door opening and closing

The heavy-duty hinge allows storing heavier items in the door bins, as well as opening the door to an angle of 115° . This allows a clearer look of the interior and makes loading the fridge and taking the food from it more convenient as the door won't keep closing. If the door is left ajar, the hinge will fully close it to save power.

XXL SpaceBox

Always enough storage space

This freezer compartment drawer is the largest in the appliance and it is ideal for storing large items like a turkey, several pizzas, or even cakes.

Side by side layout

The perfect couple for your kitchen

The side-by-side layout option allows you to maximise the use of available storage space within a limited surface area and fully adapt it to your needs, as you can combine different appliances (fridges, freezers and even wine chillers).

'WHO'S TURN IS IT TODAY' MOMENTS

Hygienic washed and completely dried dishes take the best care of your healthy meals.

Less stress and mess over who does the dishes.

FROM “CLEAN” TO ULTRA CLEAN

UltraClean DISHWASHERS

When it comes to the question of cleaning dishes, it is not about who or what is going to do it, but rather how it is going to be done. What looks clean is not necessarily clean, as eyes cannot detect the bacteria or virus. Gorenje new generation of UltraClean dishwashers ensure your family totally clean and perfectly dry dishes every time. Inside the elegant design they bring you high quality and high-hygiene performance with amazing new features that really simplify your everyday life. Spacious and flexible interiors, adjustable baskets or high-pressure water jets that effectively remove dirt, further contribute to the quality of the new Gorenje dishwashers.

Perfectly cleaned dishes ready to serve your next meal.

AS FLEXIBLE AS YOUR TIME WILL BE

16 place settings

LOAD & FORGET!

Gorenje UltraClean dishwashers offer enough space for all your needs. Three baskets enable washing up to 16 place settings at a time. The fully flexible interior allows for different loading options, the use is simple and you can really throw the ultimate party!

ConnectLife

All about your dishwasher at your fingertips

Simplify your life and have all the possibilities to control and check your dishwasher via app on your mobile device. Remote control, mobile notifications and ticketing are functionalities that will help you manage all dishwashing operations smoother and faster from wherever you are.

UP TO 30% BETTER CLEANING RESULTS

30 %
BETTER
RESULT

Top SprayArm

The additional spray arm, located at the top of the dishwasher, ensures better water coverage and thorough rinsing for up to 30 % better cleaning results. All dishes and cutlery will always be washed to perfection.

Adjustable baskets

Carefully designed interior

The baskets are equipped with highlighted movable elements and a customizable basket layout for easy loading. The truly simple two level basket adjustment system allows you to fit even the biggest pots and plates. The plate rack in the lower basket can be easily folded. Cutlery can be perfectly organized on a special tray, where they are positioned separately for perfect cleaning and drying results. Every detail is carefully designed for easiest possible handling.

MultiClick

Adjusted to every single pot

The truly simple two level basket adjustment system allows you to fit even the biggest pots and plates. It makes your dishwasher's interior completely adjustable to your current needs.

SmartControl

Just one touch is enough

Navigating your dishwasher has never been easier! All the controls are located at an ergonomic position with a straightforward left-to-right logic of operation. While all models excel with the white LED display and all are also enriched with touch control. Just one touch is enough to start the dishwashing process.

Status LedLight

Always in control

The special LED light installed on the lower part of the dishwasher door constantly indicates the current stage of the dishwashing program. That way you always know if the dishwasher is working or if the washing cycle is over.

Intensive CleanZone

Perfect solution for toughest stains and highest level of dirtiness

The new Gorenje dishwashing models have the perfect solution for toughest stains and highest level of dirtiness: two powerful and high efficient nozzles, located in the rear part of the tub. With application of high pressure water, they are targeting directly the hardest stains, perfect for cleaning pots, pans and baking trays.

AUTO
programmes

AutoProgramme

Party for two or twelve – the dishes will be spotlessly clean

Sometimes all you need is to give the glassware a light rinse, on other occasions your dishwasher is full of heavy dishes with left overs from Sunday lunch. The advanced sensor technology will always adjust your dishwashing programme to clean dishes perfectly with optimized water and energy consumption.

FastEfficient in 1h

Effectively fast

An effective and fast programme designed for daily use on dishes with slightly dried leftovers. This program works at 65°C and it is finished in 1 hour.

**CLEAN
GLASSES IN
NO TIME**

15 min SpeedWash

Clean fast so you can slow down

Imagine throwing a dinner party and the dishes from the main course are cleaned in the time it takes to serve dessert. When you select the one hour programme together with the SpeedWash function, Gorenje dishwashers will do your dishes in only 15 minutes. Perfect for handling the volume of dishes created by having multiple guests in the house.

EcoProgramme

Saving energy

When you select the ECO programme, your appliance will use lower wash and rinse temperatures and minimise the amount of water required while still achieving effective dirt removal.

ExtraHygiene with UV Technology

Always a perfectly clean dishwasher

Real antibacterial effect also at lower programme temperatures (example Eco 55°C). The UV light function is activated via new UV option, which is carefully placed in the hydraulic system. UV function is optional and can be used on all programmes. With combination of Eco, Auto, Intensive, Daily, Night and Hygiene programme, it removes up to 99.9% of bacteria and viruses from the rinsing water.

ExtraHygiene

Always a clean baby bottle

This programme includes an additional rinse with cool water, followed by an extended wash with hot water at 70 °C to eliminate 99.9 % of all bacteria. The program that mimics the sterilization process is made for anyone with exceptionally high hygiene standards.

Night programme

Quiet washing at only 37 dB

With Night programme the new Gorenje dishwasher is 2 dB less noisy than the standard programme. Your dishes will be clean in the morning and your sleep will remain undisturbed.

SUPERB DRY DISHES

WITH NO
EXTRA
ENERGY
CONSUMED

SmartUltra Dry

After the washing cycle, fan gets activated and removes all hot steam from the tub. The moisture is directed back to the tub. The dishwasher door automatically opens just slightly to let in fresh air, resulting in effective protection of the kitchen counter from hot steam outlet.

This allows fresh air to reach the dishes, so the washed items like plastic dishes dry completely.

TotalDry

Perfect dry dishes

Excellent for quick drying with low energy consumption. After the washing cycle, the dishwasher door automatically opens just slightly to let out the excess steam. This allows fresh air to reach the tableware, so the washed items like plastic dishes dry completely.

DetergentDispenser

Minimalistic sliding detergent dispenser

The new Gorenje dishwashing appliances are fitted with a minimalistic sliding detergent dispenser from where the pod pops out silently. The functionality of easy-to-clean dispenser makes better detergent dosage and wash all types of dishes.

SelfCleaning programme

Always a perfectly clean dishwasher

A clean dishwasher tub ensures that the washing performance will always live up to your expectations. Run the self-cleaning program once a month and you'll never have to hand scrub the dishwasher tub, spray arms and pipes again.

Effortless GlideGuides

Loading and unloading has never been so fast and easy

Effortless and fast loading your dish, upper basket have now smooth gliding. Loading and unloading has never been so fast and easy, thanks to user-friendly ball bearing guide rails on the upper basket.

IonTech

No more bad smells while waiting to fill-up your dishwasher

Everyone is familiar with bad smell that comes from a few days half loaded dishwasher that has been loading for a few days. The advanced IonTech technology built in Gorenje dishwashers operates on the principle of the natural process of ionization, which naturally eliminates odors and keeps your dishwasher fresh, even when it is full of dirty dishes.

StartDelay

Clean dishes, lower electricity bill

Program to start the dishwashing process later and let the dishwasher work whenever it is most convenient, for example when electricity is cheaper. The dishes will be perfectly washed right when you need them.

Total AquaStop

Do not worry about water spillage

With the AquaStop safety feature, the dishwasher can be safely left to operate at night as well as in your absence. In case of a leakage or flooding, AquaStop automatically cuts off the water supply while the pump drains the water out of the dishwasher tub. AquaStop remains fully functional over the lifetime of the appliance.

SuperSilent

No louder than a whisper

The best Gorenje UltraClean dishwashers operate at noise level which is equivalent to a whispered conversation between two people. The silent operation comes as a result of special sound insulation, efficient motors, high-quality materials and innovative solutions of the dishwashing system.

Inverter PowerDrive

Remarkable power, high efficiency

The new powerful brushless Inverter PowerDrive motor with speed regulation assures high performance with notably less noise, low energy consumption and a longer lifetime.

'I WONDER HOW MY MOM DID IT' MOMENTS

Deep washing and gentle drying with the power of ions and steam for de-wrinkling even delicate shirts.

No more bugging mom.

reddot award 2018
winner

ALWAYS
FRESH AND
TREATED
WITH CARE

WaveActive WASHING MACHINES

Gorenje **WaveActive** washing machines use the unique **IonTech** technology to tackle even the toughest stains with the gentlest care. Using the power of the natural ionisation process ensures best washing results without high temperatures, additional chemicals, softeners or other irritants, it prevents the deposit of lime scale, which prolongs the machine's life cycle. With adding convenient **SteamTech** technology our machines helps save you time, money and unnecessary effort.

reddot award 2018
winner

So you can enjoy in what's really important.

GENTLE CARE FOR THE MOST SENSITIVE GARMENTS

WaveActive

What if you could have virtually wrinkle-free laundry — just out of the washing machine? Now you can, thanks to the unique wave-shaped drum pattern and 3D ribs, developed to soften fabric fibres for impeccably smooth laundry. **WaveActive** drum technology delivers perfectly clean clothes, while ensuring extra care for your silk, wool and similar sensitive garments.

PERFECT
LAUNDRY
WELLNESS

Drum illumination

No more missed socks
in the drum.

Lights the interior of the drum when the door opens at the end of the washing cycle.

**ABSOLUTE
MUST HAVE**

ODOURLESS, SMOOTH RESULTS WITHOUT A SOFTENER

SteamTech

When you really want to ensure that your laundry is bacteria- and odour-free, there is no better way than engaging our ingenious end-of cycle steam treatment. Not only will you ensure that your laundry is safe if you or your loved ones have allergies, but your clothes will also be less creased and delightfully soft even without the use of softener.

5 WAYS WASHING WITH STEAM WILL MAKE YOUR LIFE SIMPLER

- 1. Less ironing.**
They will minimize wrinkles and ensure your clothes are smooth even without ironing. Just don't forget to remove them from the washer as soon as the cycle is finished.
- 2. Eliminate odours.**
Washing machines with steam programmes can remove unpleasant odours more efficiently than regular washing machines, while still being extremely gentle to the fabric.
- 3. Save money on softener.**
Who doesn't love to save money? With the additional steam treatment, your clothes will be extra soft and you won't even have to buy softener.
- 4. Less bacteria and allergens.**
Steam has a high temperature that ensures impurities are removed more efficiently. But because the fabric doesn't get soaked in hot water like it would in a regular high-temperature cycle, it's properties remain the same and it doesn't get damaged.
- 5. Refresh clothes.**
Sometimes your clothes are actually clean, but just need a bit of freshening up: for example a jacket after you've been to a busy restaurant. Special steam programmes can save you the trip to the dry cleaners' and refresh even your most sensitive garments in less than 30 minutes with no additional chemicals.

ExtraHygiene program

Removes up to 99,9 % of bacteria from your clothes

ExtraHygiene, steam washing program removes up to 99,9 % of bacteria and yeasts from your laundry with the help of steam and high-temperature washing. Clothes will be perfectly clean and at the same time your washing machine will be clean for a longer time, without microbial coatings and related unpleasant odors.

AllergySteam

Say goodbye to allergies

Protect your family against allergies with the intense heat of steam and an extended rinsing process with an increased quantity of water. It efficiently removes allergens, like dust mites and pet dander, without any damage to your clothes.

SteamRefresh

Always fresh clothes

This unique programme produces large quantities of steam, that refresh the clothes and facilitate ironing.

ShirtsSteam

Less time ironing shirts

The **ShirtsSteam** programme is tailor-made specifically for washing shirts to ensure they are not only thoroughly clean but also notably less creased, so you won't have to waste too much time ironing them.

CottonSteam

Steam treatment for cotton

The **CottonSteam** programme was developed specifically for treating cotton garments, that can handle higher temperatures and spin speeds.

MixSteam

Gentle treatment for various materials

If you usually wash mixed loads, where you combine garments from various materials, including synthetics, the **MixSteam** is just the right choice for you. With a lower temperature and spin speed it will take gentle care of your favourite items.

IONISED BUBBLES FOR 30% MORE STAINS REMOVED

IonTech

When was the last time you could do more — by using less? **IonTech** applies the natural process of ionisation to remove 30% more stains even at low temperatures with no additional chemicals. The ionised bubbles ensure that the detergent dissolves much more effectively, allowing the cleaning agent to penetrate your laundry better and do its job more efficiently. **IonTech** also prolongs the lifespan of your washing machine by preventing the deposit of limescale on the heater.

**WORKS
EVEN AT LOW
TEMPERATURE**

IonWash 59'

**Perfectly clean laundry
in less than an hour**

IonWash 59' will quickly and gently remove 30 % more stains thus assuring A washing results, even with 3/4 load.

PowerWash 59'

Your favourite items always ready to wear

You will need less than an hour to wash your clothes, thanks to this quick and intensive washing programme suitable for a half load.

AllergyCare

Extra protection for sensitive skin

The **AntiAllergy** programme uses a higher temperature and extra rinsing to efficiently eliminate traces of detergent on the fabric. The allergens, that could cause an unpleasant sensation, are removed and delicate skin protected.

AUTO
Wash

AutoWash

Always the right programme

Can't decide which programme to choose? Just select **AutoWash** and your washing machine will select the best washing cycle for your load. You can relax, the clothes will be spotlessly clean, regardless of their material.

StainExpert

The most efficient stain care

Effective removal of stains no longer requires a high temperature or additional treatment of clothing before the wash. The perfect combination of temperature, time, and water will automatically remove up to 36 types of stubborn stains from 3 main groups: fruit (oranges, tomato sauce); organic stains (fat, butter, eggs, grass) and coffee (including tea, chocolate yoghurt, pasta, make-up).

GREENGUIDE

GreenGuide

Energy consumption always under control

The easy to read **GreenGuide** indicator gives you real time feedback on how efficient your chosen programme is, helping you save water and energy.

Inverter PowerDrive motor

Powerful, yet silent motor

This quiet, but very efficient motor is designed to ensure a long life of your washing machine, saving energy with each cycle.

Simple Interface

Three steps and you are ready

The easy to use interface with centrally positioned selection knob allows you to start washing in just 3 easy steps; turn on the washing machine, select the programme and press start! Without any submenus for selecting extra functions and settings, but you do have the freedom to the settings on the large touch interface, so you can be sure your garments will be washed just as you like it.

DoseAid

Optimal detergent dose for every load

DoseAid will always help you find the optimal dose of detergent, regardless of the amount of load you put in your washing machine, so you can rest assured you're using detergent in the most economical and healthy way.

MORE STEAM FOR LESS IRONING

WaveActive TUMBLE DRYERS

Gorenje **WaveActive** tumble dryers with **IonTech** technology not only efficiently remove allergens and unpleasant odours, but also significantly reduce creasing. Time-consuming hours of ironing are minimized, if not eliminated.

reddot award 2018
winner

So you can spend your time
on what's really important.

SOFT & SMOOTH CLOTHES WITHOUT WRINKLES

SteamTech

When in doubt — just add steam! Steam not only eliminates any bacteria, odours and allergens that might be hidden in your laundry, but ensures that your garments are softer, smoother and practically wrinkle-free. And ironing? Purely optional.

STEAM FOR
SMOOTH AND
WRINKLE-FREE
LAUNDRY

SteamRefresh

Clothes free of unpleasant
odours and wrinkles

This eighteen-minute steam treatment removes most wrinkles, eliminates any odours and refreshes your blankets, winter jackets, or any other garment, making it the ideal choice when you want to just quickly freshen up your clothes or avoid ironing.

SO FRESH & CLEAN, WITHOUT ALLERGENS, ODOURS OR SMOKE RESIDUES

IonTech

Nobody enjoys ironing — that's why we made it easier for you. By applying negatively charged ions to the drying air your laundry will be virtually crease-free. This means much simpler ironing and your clothes will smell fresh. The ionizer creates an environment free of most allergens, smoke residues, pollen and the electrostatic charge accumulated during the drying process.

MINIMIZE
CREASING
MAXIMIZE
FRESHNESS

IonRefresh

Quick refreshment for your clothes

Do you need to quickly remove odours from your clothes? With this special refresh program with ions IonRefresh your clothes will be ready to wear and almost as freshly washed in just 30 minutes.

LESS WRINKLES, EASIER IRONING, MORE JOY

WaveActive drum

Imagine having to iron less — and enjoy more. The wave-shaped drum in our **WaveActive** tumble dryers ensure that your most sensitive garments will be treated gently and come out perfectly dry and virtually wrinkle-free. You might still need to iron, but it will be much, much easier.

SENSITIVE
TREATMENT
OF ANY
GARMENT

Drum illumination

Perfect overview when
unloading

Lights the interior of the drum when the door opens at the end of the washing cycle.

TwinAir

Efficient drying of even the largest piles of laundry

Even the largest pieces of laundry will be soft, evenly dried and less creased, straight from the dryer thanks to this patented bi-directional air blowing system.

Dryer modes

Perfect match for your needs

Our technology makes sure every type of fabric is dried in the best possible way by delivering the optimum combination of temperature, rotation and time. These settings can be further adapted with different drying modes, allowing you to find just the right combination for your current need.

Speed 40'

Your favourite items always ready to wear

Your laundry can be dried in only 40 minutes by optimising all stages of drying and using the inverter compressor.

AirRefresh

Quick refreshment for your clothes

Special refresh program for refreshment of your clothes after sport activities or after dinner. Fresh air helps to remove odours, food and cigarette smells. In 30 minutes time your clothes are ready to wear and almost as fresh as just being washed.

Inverter PowerDrive motor

Powerful, yet silent motor

This quiet, but very efficient motor is designed for a long life of your dryer, saving energy with each cycle.

Condensation Class A

Eliminates problems of excess humidity when drying clothes

In each drying cycle **WaveActive** dryers condense an impressive 90 % of humidity from clothes, ensuring complete dryness of your laundry and eliminating any problems of excess humidity in your home. That means 55 l of water less per year will be released into your living space, compared to tumble dryers with B condensation efficiency class.

**3 EASY
STEPS**

SimpleInterface

Three steps and you are ready

The easy to use interface with centrally positioned selection knob allows you to start drying in just 3 easy steps; turn on the dryer, select the programme and press start! Without any submenus for selecting extra functions and settings, but you do have the freedom to the settings on the large touch interface, so you can be sure your garments will be dried just as you like it.

EcoEye

Energy consumption always under control

The easy to read **EcoEye** indicator gives you real time feedback on how efficient your chosen programme is, helping you save water and energy.
